We also added weekly rankings to give players more opportunities for exposure.2. Cycle 1 Season 2 (9/17 Å € â, ~ "11/18) offers you better awards, more fresh effects and more popular functionality than before.3. Improved visualization of some effects, as well as emote performance and basic checks - Royale Pass Month 3: Chef Special (9/17 *10/17) Best Awards at the same price! Will you be the golden chicken? Try your luck! I absolutely love this game and played every day since I found it a month ago. I even spent \$ 25 on the S5 pass to support you guys. I really wanted to give 5 stars but there is something that is throwing me at any end. Dies that you join the team mode, live for several minutes and get some kills and complete things towards missions. But then you die .. it happens right? But I learned the way difficult that if you leave the game after dying, but someone in the team is still going, don't get credit for anything you did in that game (kills, DMG or Healing done, etc. All that can count to Some RP missions or daily quests). The only way to get your credit is to stay and specot until the last member of the team dies. Because, because, you have to expenditure possibly 20-30 minutes sitting there only to get credit for the things you have already done. I think this is really disgusting and you don't feel very well. Especially since this is a demanding mobile game, because wasting another 20 minutes of battery life sitting there when you can't play, only specta. Come seriously guys give us this quality updating of life, it makes sense. I would go back to 100% and change this review of 5 stars, I have no other complaints about this fantastic game. The game is fun, everything works well and it's nice to play! I played since it came out and without problems what never except the fact that hackers have found a way to take advantage! It's not just because people are actually trying to classify and others hackings to classify. People are putting the money in this game and what can we make you screw once from a person who shoots through a wall? Naah is not right but really what do you do when we report them? However sometimes, sometimes, when I stretch my player stants the backup that killed me sometimes. Some cars drive silly, slide or don't even want to drive normal even sometimes people will not die when they hit them on a legitimate speed to kill them, it makes that noise. The robots are fresh because free killings and free booty but once I was in the middle of a battle and a bot was shooting me from behind like what? Or give away our position quickly because we're killing him or we're shooting maybe we shouldn't have robots and hackers? The game would be a 5-star and make more money \$\$ You should also add the new PLEASEE maps, I know Miramar is a new one, but it would be nice !!! I am a decent player and I know it's not my next update that you should solve those and add that new map please likes us a lot! Overall the game will always be my favorite game of Battle Royale! Thanks! Hi, thanks for bringing him to our warning. Please send us screenshots of such activities on pubgmobile cs@tencentgames.com. We will take the necessary actions against players who Our game. You can also return the gambling options into mobile pubs. With your help, we will make the mobile PubG the best game that can be! I played pubg for a couple of years every time it's the same when it comes to purchases. I bought \$ 10 for the wheel value of luck loot and I absolutely didn't have a lot of good value. It is obvious that the developers control the whole loot that is purchased so that PPL spends more money. Super frustrating I returned to playing call of duty mobile because they offer more skins around and I'm not sagged with the loot. The game plays everything else is very glitchy and even when the servers give you a football of points to lose points and the problem has never been solved. Reporting of anything for them is useless that they never answer and seem to not just want money from people who never update with new maps or offer a better booty. I'm done with this game is a waste of time. I have to change my review because I forgot the most important review of all of them. Ok, I don't understand how I was playing the game, I was shot down with a 250 body armor helmet 3, my helmet was full of 150 points and body armor at 250 nothing was taken away but I was shot down by someone who shoots you. Fa Nooooo makes sense to have armor and helmets if all the damage won before being felled !! Plz fixes the problem and only then will I return to play the game !! What is the agreement with RP I completed the AM Max season out of 100 and have left missions, complete the missions with my RP non-stack but not yet if I buy RP Implier at YA € â, ~ direct looting! Hi, we apologize for the inconvenience caused. Please contact our customer service team at stake with details, we will investigate you and help you immediately.
