All of the following Oppo Stock ROM (zip file) contain the original Oppo USB driver, the Flash and the Flash File. After downloading the firmware, follow the flash instructions or install the firmware on your device. Read me once: [\*] After flashing (installation) the Oppo l'OppoROM on your device, you may need to flash (install) the IMEI tool using the IMEI tool provided with the firmware file. If you are going to flash the IMEI, then flash the original IMEI that comes with your device. [\*] USB OPPO Driver: If you are looking for the original USB driver, then go to the USB OPPO driver page. [\*] We include firmware: if you are looking for any specific firmware that is not listed above, you can request it via the comments box below (do not request firmware via the contact page, or it will be ignored). On this page, you will find the official link to download OPPO A33F Neo 7 Stock Firmware ROM (flash file) to your computer. The firmware is available in a zip package containing flash files, flash tool, USB driver and flash processing manual. The flash file will help you upgrade, downgrade or reinstall the Stock (OS) firmware on your mobile device. In addition, flash file (ROM) also helps you to repair your mobile device if you address any software problem, bootloop theme, IMEI problem or dead issue.
