I played Munster Hunter for the last 4 titles and I have a big fan of gameplay and graphics. This game is however unique in the way you can practically capture (door) monsters and use them to fight the style PokÄ ç Mon. It is a perfect mixture of the hunter monster and PokÄ ç Mon. I love it absolutely. The only bug with the game I lived is that the game crashes when you get a call, so if you're playing on your phone, make sure you save every possibility you can get. Lucky for me, I like a loser and nobody like it, so I won't take the calls often but I found them among huge battles or after finding a perfect egg and I lose my progress. Apart from that bug, I say that this is an easy 5/5 star! I love this game. I spent at least 200 hours on the 3DS and get close to 50 on this version and now they have now been posted to post the game content. This game is huge, there are tons. In terms of a mobile game, especially, you will never find anything so fair and in the long term on the AppStore like this. The price is high but don't forget that there is a free demo to play and the game itself should never be online. My only problem is that we do not have updates of 1.2 or 1.3 from Japan that we add so much contained as we have now, and considering that this is already at least a game of 20 hours who say something to just what it can be more this game. If we get those updates, I would like to gladly take the 5-star rating. I have not yet tried online, but I can release my assessment if the PVP does not work properly since I often build my monsters for this purpose alone. I say more but it is difficult to say something else that has not been told before in other reviews. Not part of the review, only a suggestion that addresses one of the issues that people seem to have with savings must save the game from a Catavan support or bed in your character's bedroom. It is a slight inconvenience yes, but I suppose the price of this was a 3DS game before. You can also upload autosaves and the game is conveniently all that is inserted a new loading zone or access a support. These 2 rescue styles are separated so you can still make eggs on the 3DS. I love this game, it's a good game that makes you feel like a Nintendo. I always try to find games like this and I live that this game wants it! You don't need internet to play this game and makes you feel like ... you can really do anything in the game! I mean you come !!!! You can drive monsters and be a friend who doesn't want it !! The only reason I would not value this 5 stars is because the category is just an adventure but I want romance! Locke Achke These types of games more but if they put romanticism in the game, it would be better 10 times. And in Japan they already update 1.2 and 1.3 and we haven't yet that! Have a better graphic and Stories to continue !! I want that brother !! I love this game and Ive played more than 200 hours already !! I recommend playing this game forever !! P.S. Ok, so the way to save in the game is either at the catapost or when you go to your room / bed of your staff and sleep. But there is a moment in the game where you have to go and click to sleep in a So search for that! Well, all this might seem boring, but I mean we have a fantastic game for this kind of action and doesn't have a concern like this ?? !! I mean, I think it's beautiful fair.
