How to win money on lucky day app

Lucky Day App is available on the Google Play Store for Android devices or on the App Store for iOS devices. This is a free app that allows you to enter into the lottery, win money scratching lottery tickets, and playing slots. Furthermore, the app holds raffles and different sweepstakes that you can enter each day. This app won't take away your credits or money to enter the raffles. Each day you use the app, you'll be rewarded bonus points in your account. You can decide if you'd like to scratch off tickets or enter raffles and sweepstakes. This is a fun app and gives you different chances to win money and gift cards. How Does it Work? You'll need to go to the Google Play Store or the App Store to download and install the app on your Android device. Once installed just register with the company. The game is free to play and each day you use the app it adds credits to your account. There are no ads, offers, or videos to watch. You have the choice each day to enter a raffle, sweepstakes, lottery game, or scratch off lottery tickets to win cash and prizes. This app doesn't work in all countries; however, the owner of the app is adding new prizes for different countries worldwide. How To Win Money: Each day you use the app, you'll have the chance to enter the daily lotto drawing to win \$100,000. You can scratch off lottery scratch tickets for a chance to win \$10,000. All you need to do is match 3 of the winning symbols to collect your prize. You have a chance to win different gift cards from Amazon, Walmart, Dunkin Donuts, and Target to name a few of the top brands. The majority of gift cards is only available if you live in the United States. Each day the site has a raffle where you can win different prizes. This is open to everyone and it is free to enter. Each time you enter the lotto, scratch off tickets, enter the sweepstakes or raffle, you'll need to have the credits in your account. You can easily earn the credits from the game to enter these chances to win cash or prizes. What Can You Do Daily On the App? The daily lotto winners are announced at 7 PM. PT. Each day at 12 AM. PT the site adds new daily scratch cards for you to scratch and win. At 6 PM PT, the site will add bonus scratch cards for you to scratch and win. It only takes 5 minutes each day to play. How To Earn Credits To Play The Game: Each day you use the app, you're given 2 credits. Every 24 hours the app will give you free credits as long as you open the app each day. The more you use the app on a daily basis, the more credits you'll earn. By referring your friends, you'll earn 5 play credits and a free bonus from the app. If you continue to check Facebook, you'll find bonus codes listed on the account from time to time. All you need to do is enter the bonus codes into the app and collect the credits you need to play the game. How Are You Paid? The company uses PayPal to send you your earnings. You'll need \$10 in your account before you can cash out. If you live in the US, you can redeem your token for different gift cards. You'll need five million tokens in order to exchange your tokens for different gift cards. What Are People Saying About The App? Some people have matched 3 of a kind on the scratch-off tickets and didn't win any cash. Their account was credited with token instead. The site has made an update which is causing a lot of people problems to cash out or receive their prizes. The app seems to allow you to win small prizes, but never the jackpots. After the update, the app took the tokens and money from many peoples accounts. They lost all their earning when the app automatically updated. Some people claim that only people living in the US can win the drawings and money from the app. The new update isn't giving the token credit or crediting your account with the cash prizes you've won. After you reach a certain amount of money in your account, it seems like the app is stuck and you can't earn any money for a long period of time. It appears that the raffles on the app have expired. However, the app still allows you to invest your token in the raffles. It appears that some states in the United States can't use this app. The app is not working in New York City. People living in India are claiming that they can reach \$5 on the app and it stops allowing you to earn. You are stuck with this earning and can't advance so you can cash out. Conclusion: This is a legitimate app and it does pay you to participate in the daily lotto, sweepstakes, and scratch-off tickets. You can win cash and tokens that can be exchanged for different gift cards. If you'd like to exchange your tokens for a gift card, you'll need five million tokens. The one good point about this app is the fact you never have to invest your own money in order to win. The app is completely free to join and if you're lucky, you'll win a bit of cash scratching tickets or entering into the lotto. Recently the app has not been paying out. People have complained that after the update they lost their cash and tokens in their accounts. Furthermore, the app can be used with certain countries worldwide, but they seem to have a problem when it comes to cashing out on the app. After the update, this app has many bugs now, won't credit or money or tokens, and seems to have stopped paying out. A few people can't reach payout on the app because the lotto, scratch off tickets, or daily sweepstakes are paying out. If you'd like to try this app just make sure that you understand there are a few complaints and problems with the app after the update. The company is there and willing to work with you. However, the earnings on this app have slowed down and in many cases have stopped. People are stuck in one place and can't seem to advance so they can cash out their tokens for a gift card or request payment through PayPal. I love the outdoors, organic gardening, fishing, swimming and hiking. I enjoy writing, poetry, and cooking. I am a computer specialist and own my own business. The app won't take away any credits or money to enter the raffles. You only need the open the app and use it to easily, albeit slowly, try your luck at winning money. This app is no scam at all. If you are a fan of lottery games and would like to see how your luck pans out, this is a harmless app to try. Win Using Your PhoneLucky Day is a legitimate lottery app that hosts a bunch of daily raffle games. The app will give you a chance to win up to \$100,000 in cash or even earn cool rewards, like gift cards to certain stores or restaurants. Some lottery app will sometimes require you to pay up to even roll for your luck. Others will even advertise themselves as free but will scam you in the end through some shady and obscure means. However, Lucky Day is different. It acts as a proper method of passively winning real money, and all it requires from you is your presence to play its games, every day. You get some daily tokens when you log in, so you can play. You can also get more by doing certain tasks, like referring friends to the app or sharing on your social media. The minimum requirement to cash out your winnings is \$10, and Lucky Day sends it all through Paypal. Unfortunately, while people have won from the app in the past, much of the app's functionality will leave you frustrated. Sometimes, the app erases your credits and tokens after an update. More, there are times when you'll get stuck at a certain number under ten, so you can't cash out. You might even end up winning cash but get rewarded with tokens instead. For all of Lucky Day's convenience, it sure makes digital lottery even harder—which us ironically just like real-life lottery.Easy to playDaily gamesDaily tokensNo need to purchase anythingCan't cash out money all the timeCredits and tokens may disappearLimited to certain regions In the spirit of full transparency, know that this Lucky Day App Scam review contains affiliate links. This means if you make a purchase through these links, I may receive a small commission at no extra cost to you. Click here to read my full disclosure policy. You probably agree that most people would love to find ways of making a bit more cash on the side. Most people struggle to find legitimate ways of doing this. Well, Lucky Day App claims that you can do this by playing some raffles, lottos and scratchers on your phone in your spare time. This Lucky Day App review (with video) will uncover the truth behind the app and show you a legitimate way that you can make money online to free up your time. Name: Lucky Day AppOwners: Joshua Javeheri (10 out of 100)Website URL: luckydayapp.comType: "Make Money by Being Lucky" (not really a thing but hey ho...).Success Stories: 1 out of 100Price: Free to download and playMaketimeonline.com Rating: 6 out of 100 Pros Can be a bit of fun (sort of) ... Simple and easy to use Cons Time-consuming for a little reward... log in each day to scratch some stuffA lot of people get "capped" before they reach the \$10 payout markTokens are constantly handed out to make you think you have a chanceChances of winning anything are proven to be really lowComplete "luck" to win, and no control You can use the app to play scratchers to have a chance of winning money. Every time you play one of the "games" you can win money or tokens. Tokens can be exchanged for gift cards and the cash prizes go from \$0.25 up to the \$100,000 jackpot. There are three ways that you can win money through the app... You can enter different raffles to win different prizes. There are 2 main raffles to enter: Daily raffles that can win \$500.Monthly raffles that can win \$5,000 You get a raffle ticket entry every time you log in daily (for the daily raffle) or monthly (for the monthly raffle). Plus, you can purchase more tickets with 10,000 tokens too. If you match 1-3 numbers then you win the number of tokens you see below. If you match 4-6 you win the cash prizes. But if you match all 6 to win the \$10,000 jackpot! This is the most common way to win cash or tokens. As you can see the scratcher's prize money really varies. But have no fear pumpkin! Even if you don't match all 3 symbols you will win some tokens... There are a variety of ways you can win tokens on the app including... Scratchers Again this is the most common feature for the app. Note that you after every few scratchers you will have to watch a video before you can play anymore. You can earn 100,000 tokens for every friend you refer. The app makes this pretty easy to do through social media, email and text. Another "fun" way to earn some tokens. Note you can only bet up to 3 hands at a time. And watch out for that pesky "lucky" dealer! I have no idea how he always does it! It does what it says on the tin... You can earn 1,000 tokens for every video you watch. As they state it's possible to earn 1,000,000 tokens from completing surveys. Now, I can almost hear your mind saying... Technically no. It does provide you with an opportunity to make money through the app... plus it's free. The app is categorized as a sweepstakes game, meaning that their platform operates within legal parameters. Technicalities and all that eh? But what's the catch?! Well, I'm glad you asked amigo because it's starting to look like a great way to earn some pocket money. However, the more you read this Lucky Day App review, the more you will realise the truth behind making money on the app. Related content: As you continue to read this section you will realise the app may be a little bit overhyped. If you go into the app store you will actually see the truth unravel before you. Nearly every review I have seen has been a 1 star. Yet the website boasts over 800,000 5 star reviews. And the overall ranking for the app is over 4 stars. As you can see there are people that complain they have won big prizes and not been paid. But the most common complaint is... It seems funny how there seem to be hundreds of people claiming the same thing. They have won around \$8 but haven't been able to earn anything more... Strange that the payout is \$10. Do you think this is a coincidence? It seems very obvious that the app gives you a few quick wins to make you continue playing only to find yourself not being able to cash out any of the money. The app loves tokens. Just when you think "ah, screw it I'm giving up on this!" guess what happens... That's right a whole heap of tokens come your way. But guess what... 3,000,000 tokens will only pay you a \$2 gift card. Yeah, do the maths! You're gonna need a whole cruise ship full of tokens just to make it worthwhile. Seriously when you actually look at the numbers it makes you wonder whether there is any point... Here are some of the odds of winning: Lotto: \$5 - one in 20,277 games.\$50 - one in 5,461,512 \$10,000 Jackpot - 1 in 175,223,510 game plays!!!! Now, let me ask you this... do you really think a 1 in 5.5 million chance of winning \$50 is worth it? Do you really even want to be "in it to win it"? Scratchcards: The odds of winning the scratchers completely varies on how many people use the app. Because each year, they have a set amount of prizes to give away. For example, they have 1,000,000 \$1 prizes. This explains why everyone seems to get that initial \$1 win!! This is one of the most important truths to face before you even bother wasting your precious phone's storage with this app. You will not make money month in month out with it. Period. It is possible to make money from it. But it is complete luck and as we've just seen your odds are pretty slim! It's clear that this app is geared up in a way to make it seem much better than it is. You will have to log into the app consistently and put up with watching ads and videos just to be given a chance of winning anything. And you can tell from the reviews that there is definitely some sort of fixing that goes on to ensure people do not reach the \$10 payout threshold. If you have any questions and I mean any questions about the Lucky Day App, please leave them below. If you have used or currently are a using it, please also add your opinions below. As you get closer to the end of this Luck Day App review you will realise there are ways that real people can make real money online. And the great news is that it can be as much money as you want... without relying on luck. Related content: It wasn't that long ago that I was still trying to figure out how it's possible for people to make money online. The biggest issue I found was that most systems either required a load of time, money or for you to sell to all your friends and family. I wanted to find a passive system that had a few things: I could work on when I wanted (I was still in a full-time job)Didn't cost a fortune to start and maintainDidn't need me to sell stuff to my friends and family It was in September 2018 that I found the system that I still use today to make a passive income stream. In September 2019 I quit my full-time job. The best thing about it is: It's free to start Customers are brought to you that are already interested (just think about how you found this review... there was no money or time spent from me promoting this!)You get me as a personal coach to help you on your journey When you try out this program you will see why so many people recommend it. Find out how I make passive income online No credit card details required The app is technically not a scam. But it is 100% a way for you to waste your time chasing peanuts and relying on blind luck. Since you're still here I'm going to assume that you want to take control of your future and live a life you always dreamed of. There are ways you can make money online to free up your time. Click here to read the proof about how real people spend their time: Island hopping and travelling the worldSpend quality time with their family and make more than their spouse (who works full time)Train full time for Ironman events, without worrying about money The options are endless when you figure out the secret to making passive income online. And the best part is that it's completely free to try it out. Keep changing for the better, Mike P.S. Wouldn't it be amazing if you could making money online to free up your time? You can learn how to make passive income online below and learn more about my #1 recommended program...
