## GETTING THERE... GROWTH MINDSET FORTUNE TELLER

Name: \_\_\_\_\_

### GROWTH MINDSET

What Can I Say to Myself?

Instead of...	To Instead...
I'm not good at this.	What am I learning?
I'm nervous at this.	I'm on the right track.
Get up.	I'm going to give my best effort.
This is too hard.	
I can't make this any better.	
I just can't do math, so reading or social studies or writing or science...	
I made a mistake.	
It's good enough.	
That's not my track.	

### Quiz & Worksheet - Fixed & Growth Mindsets

- According to the psychologist Carol Dweck, why is it important to understand the difference between the Fixed Mindset and the Growth Mindset?
  - It allows us to understand how we behave, the quality of our relationships, and even our own happiness for a lifetime.
  - It can help people become more confident about learning new things.
  - It can help us understand people and human behaviors more clearly.
  - It can't help us at all.
- What is the definition of a Fixed Mindset?
  - The belief that the brain and intelligence change over time.
  - The belief that people can change their minds about decisions they have made with their psychological effort.
  - The belief that some people are born with certain psychological traits that other people cannot obtain.
  - The belief that change cannot and does not occur in the brain, that the level of a person's intelligence cannot change.
- What is the definition of a Growth Mindset?
  - The belief that failure and trouble is the one final and not an opportunity for growth.
  - The belief that intelligence can change, not only by learning new things, but also by the various experiences a person has over a lifetime.
  - The belief that psychological change is toward a certain direction but not all of them.
  - The belief that it is impossible for people to be changed by their experiences.
