Windows 10 1909 May 2019 updates, also known as 19h1 (Build 18362), the first update of Windows 2019 which offers a set of new features and improvements. In this new versions, the usuals have more control above updates for you to make them a surprise. This way, Windows will no longer show Cortana every time you click the Pesquiva box. The new search interface also lists the most commonly used applications, as well as recent files and activities, along with the options of filter search results for applications, documents, email web and results. This way this can invade them quickly without having to remove the mosaics one by one. Fault the first semi-annual update of Windows 10 of 2019. The policies of configuration and group for these two functions were also divided. This means you can use the text search box and cut consultations for voice queries. Larger space used and greater optimized. Now Microsoft has decided to correct some disorder keys and other problems that have caused hangers in games where processor and granted card features are most required. Cortana is moving away from the search. The Windows 10 digital assistant now has its own role in the taskbar, while the research is kept next to the Start menu. A very improved research system. This way you can remove these apps that you probably never be used. To uninstall one of these applications, go to the Start menu, click with the right access of the application and select uninstall. The search interface also lists the most commonly used applications as well as recent files and activities, all of options to filter the search results by applications, documents, e-mail and web results. At the same time, Windows Sandbox, a new topic, improvements in Notepad and other news are added. For the first, we must provide a correct key to proceed, for Windows 8.1, this key is not required to download ISO, the same goes for Windows 10. In addition, it includes Audio and microphone. Different internal improvements. Despite this, after closing the application, everything will be deleted automatically. In addition, Windows Sandbox, a new topic clear, improvements in Notepad and other news. , the taskbar and the actions center. To uninstall one of these applications, go to the Start menu, click the right mouse button on the application shortcut and select Uninstall. Although after the arrival of a new version of Windows, it is always prudent to wait a bit to end up solving all the problems, also usages that they like to perform tests with them, among others who are Dedicated to Technical Support or would like to travel with your team. Since Microsoft is behind, it puts in our provision the ISO download of your operating systems on your official website, it can be accessed from this link. To do this, go to Settings> Personalization> Topics> Windows (anyway). Oh, we'll find Windows 7, Windows 8.1 and Windows 10. The configuration policies and group for these two functions are also divided. Now, more integrated applications of your PC can be uninstalled, such as 3D Paint, Groove Music, and TV, mail and others. At the same time, it includes support for audio and microphone input. When operating as a virtual machine, it has the ability to capture full access keys on the screen and admit configuration files. Windows Sandbox is enabled only for Windows 10 Pro and Windows 10 Enterprise and can be activated through experience Enable or disable Windows features and enable Windows Sandbox option. An innence clean -Up Menad: May 2019 update has a new and less cluttered start menad. Now, more integrated applications can be uninstalled from your PC, such as 3D link, groove music, movies and TV, mail and others. Windows Sandbox: This is a function that allows you to experience applications that are not trusted à € à € Personalization> Themes> Windows (of course). An innence clean men: May 2019 update presents a new and less crowded Menad Menad. N Organized in a single column instead of the two predetermined columns in previous versions. A single section. In this way, you can disagree with them without having to remove one-by-one mosaics. Iinstall More Integrated Applications: Previously, you can only uninstall certain applications that would come by pattern. Major improvements Performance and details in games. Alternatively, you can enable Erasure mode by changing the topical settings on your computer. If you change your opinion, you can always get the application for free in Microsoft Store.Cortana is separated from the search: Windows 10 Digital Wizard now has your own in the taskbar, while searching It keeps your place next to the Start menu. In TechPowerup, they explain how to download the ISO of our PC totally legally and very easily, more than explain it: make this Microsoft website that we are accessing from a mobile terminal. Uninstall more integrated applications: Previously, it can only uninstall certain applications that came by pattern. Other improvements to be discussed are RAW image support. Now an improved cut. For the May 2011 update, which took care of the delivery problems, but was finally delayed 1 month, that is, in April this year for clear reasons.
