The BHIM application can be used to transfer money to anyone or merchant who has the application installed, and with more than 30 accessible banks through the application, it is quickly becoming the preferred medium of safe and without complicating money transfers O. Features of BHIM App: Money transfer instantaneous: With the BHIM application, money can be sent on a real-time basis at any time and from anywhere. In addition, there is no complicated process of beneficiary account and filling the account details, such as a number of account and IFSC code. There are no holidays: The best part about this application is that you can send and receive money, even on holidays and weekends. Divide with friends: The application also allows users to divide accounts with users' multiple. Payment reminders: Another feature of this application is the possibility of payment reminders schedule. Benefits of BHIM App are simple, fast, and secure without additional charges The application is free to download payments can be made to banks not UPI as well as the application works 24/7 Language available In 13 languages, including English, Bangla, Hindi, and Gujrați. UPI 2.0 UPI 2.0 saw your creation In August 2018. This is the second and most recent version of the popular background transfer platform in India. It has become popular to replace the first version that had been created to facilitate peer-to-peer and greasy fund transactions. Other than that savings accounts and current accounts, now you can link your special check account for UPI too. Now you can do your transaction immediately and your benefits associated with your special check account will be available for you. UPI 2.0 will be an additional digital channel so you can access a special check account. As Subscribe as a merchant in UPI Download the BHIM Aadhaar Baroda Pay App Android Fill in the inscription form and sign the merchant agreement The bank will carry out the On-Boarding Registration and Agreement By means of its regions / transaction limit zones and BHIM charges you can make an operation where the maximum value is rs.10,000. The maximum amount of money you can transfer within 24 hours is rs.20,000. There are today charges to make a transaction through the BHIM UPI application. Supported Mobile Platforms from now on, the BHIM application is One and only app that is available under UPI. This is suitable for all Google Android smartphones and Apple iOS. How to use the BHIM application to pay in a store The BHIM application comes with a QR code and as a user of the BHIM application, you can generate an exclusive QR code on your phone to get payments from others. Now there are two types of QR codes - a QR code for specific transaction and also a QR code that is bound to the specific account. QR Code for Specific Transaction Your QR code can be generated through the BHIM UPI application to request any payment from a web application. The beneficiary must scan the only QR Code to see the amount payable and can make the payment. As a sender, you do not need to put in the amount payable, because the details of the value will be encrypted and also included in the QR Code. You can generate your own exclusive QR code to receive payments attached to the application. Other Payments Users can scan the unique code, and then enter the amount to pay. The person can then transfer the money into your account. BHIM UPI FAQs IS BHIM APP A Mobile Wallet? ANS: No, the BHIM application is not a digital or cellular wallet. It is a kind of payment application through which you can make payments using a VPA. What is UPI? ANS: UPI is not all of a kind of payment, through which transactions can be processed using a VPA. Contrary, NEFT or RTGs, there is no need for the bank account details or IFSC code when it comes to UPI. Can I use BHIM if my bank is not live with UPI? ANS: No, unfortunately, this will not be possible. What is a VPA? ANS: A virtual payment address (VPA) is as an e-mail ID that helps you identify users to use this application. It is used to send and collect money. Can Bhim be used in foreign countries? ANS: BHIM can be used if you are traveling abroad, but just to send and receive money from Indian beads. Is there any cost of transaction to use BHIM? ANS: No. It's a fully grateful service. Can I use BHIM if you do not have access to the internet? ANS: Yes. In such case, use the * 99 # service to use the application without an active Internet connection. What can I do if money has not been sent, but my bank account was debited? ANS: In this case, the transaction may have failed because of some mistake. The best thing to do is report the problem in the BHIM application. Money will be Back to your bank account in about 3 days. If I send money to the wrong person, it is possible to cancel the transaction? ANS: BHIM allows instant transfers and, therefore, once a transaction was successfully processed, it is not to reverse it at any time. However, you can try to increase a collection request by mentioning that the money was sent by mistake.
