serif style sources are the most clear and easy to read Â «Times New Roman, Georgia and Century Gothic are serif style sources. For electronic versions, SANS-Serif styles facilitate arial reading, Helvetica and Calibri are popular SANS SANS Fountains. The size of the source is also important. The source of or 12 points is the most popular, however, it may be convenient to increase or decrease slightly in certain situations. It is not recommended to go below 9 points or14 points on the main body of your CV.Use headings, bullets, and short sentences. Don't be afraid of white space. White space can increase readability, and keeping the recruiter's reading is your main goal.Check spelling, grammar, and format. Then check it again If necessary, check a third time. Be sure to use the same margins, font and size throughout. If you have any doubts, ask someone to check it for you too. Spell checking is great, but there are times when you have used a word correctly spelled in the wrong place. The spell check will not focus on "from" when it really meant "training".CustomizeYour CV should be personalized for each individual position you are applying for. Unfortunately, there is not one size fits all, as you will want to highlight different experiences and skills for each particular role you request. Taking time to research your potential employer and adjust your CV to meet your requirements will be obvious to recruiters and can help you get an interview.Keep it up to date and accurateKeep your CV up to date at all times. It's easier to update your latest achievements, certificates and training as they occur, rather than struggle to remember what you did and when if you find yourself applying for a position.It's not okay to lie or exaggerate on your CV. It may be hard to give credit for things we've done well, but not to cross the line by making things up. You will be discovered at some point and that could make it an embarrassing situation. You have things to be proud of, point them out clearly and without braging. If you follow these tips, you can write a CV that stands out in the crowd and gets proper attention from the recruiter.
