There is a "easy" way for script that? Metalufubar metalufubar He wrote: I have everything download and installed on DC using the Office 2016 models on Netlogon. Yes, I got it. Microsoft: "We know that macros are bad. According to this professional MS Office 2016 site is compatible with group pollicist, and the only difference between non-plus and plus is added Access and Skype for business on the last ... Not all the business in thousands of seats. But .... Sorry for yours in Sysvol and it's still working. silent. The GPO is attached to a user or what ok? Please inform. How we use a lot of macros, the confidence and VBA sites are really a bad scenery and I need to find a soluan There is a "easy" way for the script that? Currently you can not confirm why I do not have Office 2016 Pro DST, but as I mentioned in the post above: Lesilhouette wrote: ... The only difference between non-more and more is the adiction of access and skype for business in this last ... .GPO does not work and I have to manually drive the regedit in the area of work. olÁ, when you create a GPO, do you really see Office Admx's options? See how to block them in the GP ... So I woke up and found this topic Hi - What version of the O365 will you please? This is currently making my head - it seems that there is a change from where the O365 looks for the registry settings. I just wanted to confirm that I can control the programs of My Office 365 using these Admx® files and we use the Office 365 business apologies that this does not work for the Office 365 business. I was just checking if your suspicions were confirmed .This thing with licensing versions of non-volume honor ... gp ...
