## Windows 10 android phone call

There are tens, probably hundreds, of Android phones on the market today. Some of them are exclusive to specific carriers, some of them are available worldwide, but only some of them are at the head of their class. This week we wanted to know which Android phones you thought were the best available, not only because you complete a checklist of features or high-end hardware, but because you think they offer a great general experience. Here is a look at the top five Android phones, based on your application. At the beginning of the week, we asked you which Android phones you thought were the best. There are a lot of sites willing to tell you which phones are the best based on chips inside, camera, storage, or version of Android preinstalled, but those things do not always add up to a great user experience. We asked you which phones, past or present, thought were the best, and over 300 nominations later, we returned to highlight the first five. The survey is closed and the votes are counted! To find out which of the five contenders below took the highest prize based on your votes, head to our five followup post to discover and discuss the winner! Looking for a decent Android phone? Of course, we know that the market will be completely different within a Read moreSamsung Galaxy NoteOften indicated as a "phablet" due to its included and massive 5.3" The Super AMOLED display, the Samsung Galaxy Note (AT&T, \$299 w/contract) is huge, but many of you praisededito merge the portability of a phone with some desperately necessary tablet-as real estate. The 8MP and 2MP rear and front cameras and the 1.4GHz dual core processor don't even harm issues, and while it's definitely not the right size for everyone, those of you who have a love, and others are waiting for release on other carriers. In addition, although the Galaxy Note ships with Android 2.3 Gingerbread preinstalled, there are a lot of ROMs available to bring it up to Android 4.0 Ice Cream Sandwich, or simply replace the Samsung TouchWiz interface completely. HTC One X/SThe HTC One series is HTC's latest attempt to recreate, not that the company really needs – most people who used HTC devices love them, and HTC One X and One S are no exception to the rule. The One X (AT&T, \$199 w/contract) is HTC's new flagship phone, which features a 4.7" screen, a Nvidia Tegra quad-core 3 (international) or a Qualcomm Snapdragon dual-core processor (US/Canada), Android 4.0 Ice Cream Sandwich (with HTC Sense UI up), integrated Beats Audio and a back 8MP camera with a 1.3MP. The HTC One S (T-Mobile, \$189 w/contract) is a slightly smaller screen from 4.3", a 1.5 Ghz dual core processor, 8MP and VGA front cameras, audio Beats and Ice Cream Sandkwich. Both devices are slimming, powerhouse devices designed to bring Android lovers' attention to a selected group of high-end HTC devices, instead of those of dozen-plus HTC hasin the past. So far it works. Samsung Galaxy S/S IIII Samsung Galaxy S series of devices are some of the most popular smartphones in the world, and although Samsung and Apple are embroidered in a patent case on exactly how similar the Galaxy S is for the iPhone (and vice versa,) that did not stop the Galaxy S and the Galaxy S II to sell millions of units worldwide. The Galaxy S was one of the first dual-core Android smartphones, and certainly one of the first to characterize the new Samsung Super AMOLED display (at the time), offering bright and crisp colors even in bright light. It is still available for a song depending on the carrier from which it is collected (in the United States, it was sold under the name Vibrant (T-Mobile,) Captivate (AT&T,) Fascinate (Verizon Wireless,) and Epic (Sprint) in both 3G and 4G variants.) The story aside, the Samsung Galaxy S II is the current model of the company and features a 4.3" Super AMOLED display, a 1.2GHz dual core processor, and while it is shipped with Android 2.3, most carriers were slowly updating to bring the device up to Android 4.0 Price varies depending on the carrier and the variant you take, but one thing is certain: when it was launched, most people considered the Galaxy Scoming the best Droid Series Motorola Droid smartphone Motorola Droid (Motorola Milestone, internationally)was one of the first Android phones on the market to really bring Android to the masses - and definitely the first Android phone available on Verizon Wireless at the moment. It was a difficult call to group the Droid series together, but it is worth noting that those of you who named the Droid line in large numbers specifically mentioned the slider models, not candybar models such as Droid Razr, Razr Maxx, or Bionic (although all have strong nominations as well)-all available on Verizon Wireless in the United States. The Motorola Droid 4 (VZW, \$199 w/contract) is the current phone iteration, with a QHD 4 display", a 1.2 GHz dual core processor, 8MP rear and 1.3MP front cameras, and above all a backlit slide keyboard that allows the phone to be used in both portrait and landscape modes without sacrificing the real estate screen. The Droid line is still one of the few high-end Android devices to characterize a physical keyboard, making it popular for both portability, and with people who prefer physical keyboards to those on the screen. The Droid 4 sports Android Gingerbread, and rides Verizon Wireless' 4G network. Samsung Galaxy Nexus The Samsung Galaxy Nexus (VZW, Sprint, \$199/w contract, \$399 unlocked) is the current official "Google Phone," having launched with Android 4.0 Ice Cream Sandwich and currently acts as a flagship Android device. Performs a 4.6 inch Super AMOLED display, a curved contour screen, a 1.2 GHz dual core processor, and 5MP and 1.3MP rearcameras in front. is a pure google experience, which means that the phone is (mostly) free of bloatware and other preinstalled applications from carriers and manufacturers, and in particular lacks the touchwiz ui layer of samsung in favor of a clean version of ice cream sandwich. the phone also sports payment system nfc of google, google wallet, the camera boasts zero shutter lag, and it was the first phone to launch with ice cream sandwich preinstalled, and it is still one of the few devices that you can get that already has it. if you want the most true and pure android experience possible, or want an android phone that is officially supported by google, this is. Here, the top five android phones, based on your application. Time to vote for the sample. It was difficult this week to run down the top five considering that there are three samsung devices running, but some of them got more nominations than some of the other combined contenders, so we can't ignore the fact that many of you have a strong opinion on these specific models. Do you have anything to say about the candidates we missed? Didn't your favorite phone get enough nominations to be included? Remember, the top five are based on your most popular nominations from the call for thread contenders from before in the week. share your thoughts in the comments below. the hive five is based on readers' nominations. as with most five hive messages, if your favorite was left out, it is not because we hate it—it isidid not get the required applications in the call for the mail contenders to make the top five. We know it's a bit of a popularity contest, but if you have a favorite, we want to hear it. Do you have a suggestion for the Five Hive? Send us an email to [tips+hivefive@lifehacker.com](mailto:tips+hivefive@lifehacker.com)! Photo of Pittaya Sroilong. Sroilong. windows 10 android phone calls. can windows 10 make phone calls
