Each Dash Button costs £4.99 and comes with £4.99 credit - so are effectively free of charge. Setup is via Wi-Fi through the Amazon Prime app, but once linked will operate independently meaning all you have to do is press the button to order more product. One press shows a blinking light, which turns green after around 10-15-seconds to demonstrate the order is accepted. An alert notification will follow to your device. And that's it, job done. Dash Buttons' batteries are said to last for years too. With over 40 brands available at launch from cat food to Play-Doh there is plenty to choose from. Here are our top 10 favourite ones to get: Amazon You always run out of washing power at the wrong time, and now when you go to get the last tablet out of the box you can press the button knowing that by the next day you'll have a delivery of a new batch of washing up tablets. Handy Get Amazon Like watching teary-eyed movies, or maybe you're just one of those people that always have a cold? The Kleenex button is there for you to be able to press and order more tissues. Sadly you do have to wait at least a day for new ones to arrive before having a grizzle. Get Amazon We've all been there. Sat on the loo, done our business, only to realise the last person didn't bother to tell you they had used the roll and that you need to order more. Whether it's cursing your partner or your kids. A well placed button next to the toilet will stop you wonder just how painful using the cardboard roll actually is. Get Amazon Another one where some will wish Amazon did round the clock 24 hour delivery, but we can some unscrupulous cads having one in their sock draw ready to press when the box is empty. Get Amazon Buying nappies is boring, takes up loads of space in the shopping bag, and isn't exactly the most stylish thing to be seen with one the way home from work. Buying them online makes sense, having them automatically delivered when you're down to your last few because you've been savvy to press a button, even more so. Get Amazon Like the washing power above, but for softer. We aren't sure about you, but we are always running out of one or the other in the Pocket-lint households. Get Amazon This is for the extreme artist, but Derwent have an Amazon Dash Button to let you re-order pencils without thinking about it. Stationary on tap sounds dangerous. Get Amazon I need more darts we hear you cry, and so does Amazon. Nerf has created a button just for you if you are under siege. Just don't let the kids find this Dash Button though, otherwise we can quickly see a small armoury being built up in the following days and weeks as they eagerly press the button at the end of the fire. Get Amazon Stick one of these dishwasher tablet ordering button under the sink and you'll never need to worry about those inbetween days when you can't make it to the shops and are forced to wash the dishes like you are back at university. Get Future-proof your home with Swann's connected Wi-Fi Alert Sensors By Pocket-lint Promotion - 28 June 2022 These excellent sensors are perfect for getting alerts when whatever you're interested in happens. Amazon You know, for kids. Yep, even Play-Doh has got in on the Dash Button excitement allowing you to order more at the press of a button. The Amazon site isn't clear though at the moment whether this is ordering a huge pack, single colours, or just something random. We kinda hope it's the later just so spruce up the fun. Get Writing by Stuart Miles. 1/6 The UK is well versed in music streaming. The recent launch of Apple Music means that Brits now have numerous services to choose from - from the might of Spotify to the quality control of Tidal. Despite a crowded marketplace, Amazon is hoping that its service, Prime Music, has enough USPs to entice newcomers to its service. But just what is it offering and how is it different from the rest of the pack? In short, Prime Music is Amazon's replacement for its current music service. It adds in 'free' streaming alongside the ability to buy albums and tracks either digitally or on CD. It's Amazon's attempt to meld both free and premium content, much like it has done with its Instant Video service. While it's not perfect, it does have a number of things going for it. Five to be exact. Read on to find out what they are... Check out the best Windows 10 apps 2/6 Spotify and other music streaming services cost around £10 a month, that's £120 a year. Currently the only way you can get Amazon Prime Music is by signing up to Amazon Prime which will cost you a lump sum of £79 for the year. Not only does this undercut many of the services on the market, you also get video streaming, next-day delivery and photo storage with your membership. Yes, this is all to good to be true but there is a catch... 3/6 It may sound like a lot but Prime Music's 1 million tracks pale in comparison with the 30-odd million that are available on Spotify, Apple Music and others. Amazon has told T3.com that it doesn't see itself as a rival to Spotify et al but an alternative way to stream music. Many more tracks are available but you will have to purchase them if you want to listen to them. Any CDs you purchased in the past through Amazon, though, will automatically become part of your streaming library thanks to Amazon's AutoRip functionality. 4/6 As the old adage goes, it's not about what you've got but how you use it. Amazon is putting its million tracks to good use by integrating them into hundreds of playlists. While there's a whole host of full albums available, Amazon is hoping that its playlists will open you up to music you haven't listened to before. Some are pretty eclectic. While we won't be listening to Toddler's Party anytime soon, we will definitely be giving New Age for Yoga a spin. 5/6 Amazon has given Prime Music a big UK makeover. The reason, according to the company, that it has taken a year to come to the UK is that it has been hiring UK-based music journalists and influencers to make sure that the playlists that are being created are for a UK audience. This means that the Walking The Dog playlist that can be found in the US won't be the same as the one in the UK. Apparently, the UK doesn't find country music as palatable as, say, the US. 6/6 Although Amazon hasn't revealed the exact quality of streams other than they are 'MP3 quality', the service is available now and you can download music too for offline listening. According to Amazon, the only limit on how much you can download is the space available on your device. There's no need to update any of your apps, either. Prime Music should just appear as an option and can be listened to through iOS, Android and Fire devices, and through Amazon's online site. Check out the best Windows 10 apps
