Clash of clans hacked version

Clash of Clans - a great strategy with a slant in RPG, with great graphics and a kind of gameplay. The game tells about the confrontation between people and goblins. We have to play for people, and the main goal will be the destruction of the enemy clan.The game begins with training, which is very easy to perceive thanks to special markers, and the lack of Russian localization in no way will not prevent a comfortable game in Clash of Clans. Here you can choose between two main modes. The first mode is construction on its own territory, the second is combat mode on the enemy map. There is also a version of the battle on your site if you are attacked by goblin troops.Fundamentals of the game process consist of the construction, the creation of units and accumulation. It is possible to accumulate both ordinary gold and mysterious purple elixirs, according to functions reminiscent of all the same gold. The outcome of the fight in combat mode depends very much on how the units and combat weapons are deployed.In conclusion, it should be said that Clash of Clans is a very unusual strategy for Android-devices. The gameplay and graphics here are at the highest level, but the rest of the components are also on top. The game will surely appeal to strategy lovers, as well as those who like to play for a long time on their smartphone or tablet. Andro-Mod » Games » Mod » Clash of Clans (MOD, Unlimited Money) Clash of Clans – a large-scale military tactical strategy with an expressive medieval style, complex elements of economic development and massive battles with siege equipment, foot soldiers and spellcasters. From the point of view of the available mechanics, it's worthwhile to perceive the events taking place on the battlefields through the prism of the RTS genre - you will have to make decisions in real time, without tactical pauses. But there will still be plenty of time to "think" - new buildings are erected for a long time, resources are collected for hours and days, and to defeat opponents you can do without a balanced strategy, drawn on paper and thought out to the smallest detail.Features:- Atmosphere and events. In Clash of Clans, you will have to develop the settlement issued at the start, building up vacant land with new buildings to extract resources, and deal with opponents located in the neighborhood. And what task is easier to cope with is still a mystery.- Adversarial elements. Massive battles are available as part of multi-user confrontations or in the form of duels with artificial intelligence, designed to steal resources and story advancement.- Social interaction. As the founder of the genre, Clash of Clans prefers to tie interested strategists together. Chats, clans, guilds - those who want to conquer a virtual planet will have extensive diplomacy with the exchange of resources and ideas!- Private server. In addition to the official version of Flash of Clans, enthusiasts and experimenters offer to download a hacked distribution with unlimited resources, support for global teams and zones for tactical permutations. And, although the fruits of hacking cannot be transferred to the main Clash Of Clans server, sometimes it is easy to get enough of permissiveness in 15 minutes, and then again to command and win. It takes a lot of time to invest in, and build, your base. It is heartbreaking that as you progress, you spend longer and longer 'in the clouds' waiting for an opponent. Now, several years later, my average wait is 30 minutes, and frequently no opponent is found at all. If you can't wait for half an hour at a time staring at your phone doing nothing whilst it says 'searching' then you may be disappointed. My account got hacked like 2 times over the last 2 months, and for the first time they were kind of efficient in helping me recover my account, they took about a few days. However, a few days after my account got recovered it got hacked again! Immediately reported it to Supercell via emails and in-game support and about 2-3 weeks later nothing was done. After contacting then about 5 times later, they told me that the account got banned. The account getting banned was clearly done by the hacker and I have already reported to Supercell that my account was hacked about 2-3 before, and my account would not have been banned if they had reacted fast enough and helped in recovering. Now my account is still banned and hacked (not under my supercell id) and supercell are still not doing anything to get my account back as the ban was clearly a problem that would've been avoided if they had recovered my account quick enough. I have spent a lot of time and money on this game, the account was a close to max TH11. So I want you all to really consider if spending all that time and money on a game where their support would not help you when your account is in trouble to be worth it. As with any supercell game the matchmaking is still a problem my village still getting targetted by higher and more op players it's almost unfair I can't progress if all my Loot will just be gone and not just defending ,when raiding others I find nothing but players with more maxed out stuff and more op defence than I have it's just unfair and this is the problem with supercell games ppl I face always have spells while I don't even have them unlocked yet supercell pls make matchmaking more fair it's really hard to play when I keep getting losses for my defence it's really not balanced for my defence I always play against op players SRSLY ITS NOT FAIR I cannot advance in this game it's getting annoying why do I always have the lose against ppl who are overwhelming better than me this the problem I have with supercell games The developer, Supercell, indicated that the app's privacy practices may include handling of data as described below. Defensive Builder Huts Imagine you are in a glorious battle and your builders, instead of hiding in their huts, they take part in the battle themselves to defend your base until their last breath. Well, it's possible only on the new Town Hall 14. Now, we have Defensive Builder's Huts. Now builders can transform their hammer into a tool of fighting. We can also upgrade their huts too. Once we start upgrading them to level 2, they change their shape to a weaponized turret, that helps them to defend themselves. Hero pets Playing with heroes is fun but it's more when playing with your heroes and their special pets. You heard right, Supercell amazed us with this brand new feature where you can take part in battles with heroes and their mighty pets. These pets help your heroes with some unique & special abilities. Pet House pet house building Actually, it's a new type of unit in this game that can only be unlocked on Town Hall 14. Once you are on that level, you are able to unlock it and build the Pet House. Currently, there will be only four pets, and the best thing is that you need to upgrade the Pet House Building in order to unlock all the pets. You can manage your pets and assign them to any hero you wish to. Speaking of them, we have the following pets. L.A.S.S.I. – It's a special type of puppy, it can jump over walls, and attacks ground targets. L.A.S.S.I. is also known as the high-jumper and his movement speed is so fast that I don't think even Hog Rider can catch him. This pretty pet damages single targets.Electro Owl – This special pet shoots some amazing types of attacks, which also bounces to another nearby target. He is especially known as the high-voltage. Electro Owl damages single targets.Mighty Yak – It destroys walls with its mighty horns and helps the fellow hero to clear the path. Also known as the wall buster, it damages more to walls. Once a wall is broken, this pet will attack nearby buildings. This pet also damages in area-splash.Unicorn – The fourth and one of the best hero pets is Unicorn. It helps heroes to regain some health and recover damage. It's especially known as the personal healer. The movement speed is pretty low (16) but we are happy to see such a beautiful pet. GIGA Inferno From the upper pic, we can see the details in Town Hall 14 are so amazing and even it's the first town hall with such details. According to its theme, it draws inspiration from native mesoamerican architecture, as the developer told us. Now, we can upgrade the GIGA Inferno five times. If you don't know, when this new town hall destroys, it releases a toxic cloud of poison, as mentioned by Supercell. The poison not only damages the troops but slows them as well. New Upgrades Speaking of the upgrades, on Town Hall 14, there are lots of things to upgrade. We have additional levels for the Laboratory, Clan Castle, Eagle Artillery, all the storages, Cannons, Bomb Tower, Scattershot, Interno Tower, and Hidden Tesla. All of them are available now for a next-level upgrade. Pet Upgrades Now, we can upgrade our pets too. But we need to upgrade them in the Pet House Building. Each pet will require a massive amount of dark elixirs to upgrade. So, make sure you have your dark storage filled up. Upgrading pet house building will cost you elixirs. Check the table below. PetsUpgrade CostL.A.S.S.I15 Million ElixirElectro Owl17.5 Million ElixirMighty Yak18.5 Million ElixirUnicorn19.5 Million Elixir New Troop Levels Don't worry if you think why the defense is so strong on the new Town Hall, but hey, now we have Hero Pets. Once your Town Hall is upgraded to level 14, you can unlock the newest building "Pet House". Once unlocked, you can upgrade it to Level 4. New upgrades will unlock new pets. There are currently four of them are available which is also discussed in this article. Remember, you can use the Hero Book to upgrade all the pets on the new Town Hall 14.
