Naming alkenes and alkynes worksheet

Please wait. This won't take long. The key to success is to know the basic chemistry building blocks of the pyramid Learn how to write the chemical formula of a variety of chemical compounds using the arms and link method. This is the quickest and easiest way to learn. Armed with a basic Periodic table students can begin to write chemical formulas in one easy lesson. A test on the chemical symbols of the first 20 elements of the Periodic table. Questions20 Attempts allowedUnlimited AvailableAlways Pass rate75 % Backwards navigationAllowed Start Quiz Salt is an ionic compound formed by the action of an acid on a substance. There are many different types of salts. The most common salt is sodium chloride, NaCl or table salt, and is made up of the elements sodium and chlorine. Name Chemical formula Sodium chloride NaCl Magnesium sulfate (Epsom salt) MgSO4 Potassium iodide KI Copper sulfate CuSO4 Calcium chloride CaCl2 Potassium permanganate KMnO4 Sodium acetate CH3COONa Calcium acetate (CH3COO)2Ca Sodium nitrate NaNO3 Potassium nitrate KNO3 Aluminium nitrate or Aluminum nitrate (US) Al(NO3)3 Aluminium sulfate or Aluminum sulfate (US) Al2(SO4)3 DISCLAIMER: These handouts provide a “general” outline of the material with practice problems and answers. Each instructor may present the material differently, so not all of the material in the handouts maybe covered by each instructor, and some instructors may cover material not on the handouts. Please review your lecture recordings, notes, slides, and online text, and compare them to the handouts to note appropriate topics to work through. The material for the introductory courses (103 and 104) is gradually uploaded during the semester; the material for the organic courses (343 and 345) is available all at once. If you find an error or have a comment on the handouts feel free to reach out to Tony Jacob at atjacob@wisc.edu. Please direct chemistry questions to Piazza or your TA. If you wish to provide feedback, there are links available for the organic resources all the time; for the introductory chemistry courses a link near the end of the semester will be provided. We always appreciate feedback so thank you in advance! Here’s another useful tool: A semester calendar! It is best to print the calendar out using 8.5″ x 14″ (legal sized) paper. That way you can add all your assignments for each class in the boxes using a different colored pen for each course. This is an accordion element with a series of buttons that open and close related content panels. Answer keys for homework assignments are listed below. You should use answer keys as a tool, not to plagiarize. For you to be successful in this class you will need to do your own work and ask questions when you need clarification. Do not depend on answer keys to do your homework. In order to continue enjoying our site, we ask that you confirm your identity as a human. Thank you very much for your cooperation. In order to continue enjoying our site, we ask that you confirm your identity as a human. Thank you very much for your cooperation. AUS-e-TUTE is a science education website being developed by experienced science teachers to provide students and teachers with high quality, relevant, teaching and learning resources. The table below lists the type of chemistry resources available to non-members and AUS-e-TUTE Members: ☑ = You can access! ☒ = You can NOT access. Non-member(Links to free tutorials below) Individual Members Class/SchoolGroup Members AUS-e-TUTE Resoures(Members must log-in to use resources) studentmember teachermember students teachers LearningResources tutorials ☑ ☑ ☑ ☑ ☑ games ☒ ☑ ☒ ☑ ☑ tests(+ worked solutions) ☒ ☑ ☒ ☑ ☑ exams(+ worked solutions) ☒ ☑ ☒ ☑ ☑ drills(+ worked solutions) ☒ ☑ ☒ ☑ ☑ homeworkcheckers ☒ ☑ ☒ ☑ ☑ Teaching Resources quizzes(self-marking) ☒ ☒ ☒ ☑ ☑ interactivelearningactivities(scaffolded activities) ☒ ☒ ☒ ☑ ☑ stimulusresources(practical investigations, interesting/relevant articles) ☒ ☒ ☒ ☑ ☑ worksheetwizards(printable questions + answer section) ☒ ☒ ☑ ☒ ☑ card games(save and pr card games) ☒ ☒ ☑ ☒ ☑ Discover which type of AUS-e-TUTE Membership is best for you on the Membership Information page. Please do not block ads on this website. No ads = no money for us = no free stuff for you! The links here are for the use of Non-members. AUS-e-TUTE Members should log-in and use the links to tutorials games, tests, exams, drills, quizzes, worksheets, learning activities and stimulus resources in the Members Only area. The tutorial links below are arranged under the headings: Introduction to Chemistry (includes stoichiometry, practical skills, etc) Organic (carbon) Chemistry (nomenclature, structure, reactions, properties) Biochemistry (Biological Chemistry) (structures, reactions) Inorganic (non-carbon) Chemistry (Periodic Table, transition metals, solid state) Physical Chemistry (includes atomic structure, bonding, equilibrium, solutions, acids/bases, gas laws, thermochemistry, thermodynamics, electrochemistry, kinetics, surface chemistry, etc) Analytical Chemistry (volumetric, chromatography, spectroscopy, electrophoresis) Environmental Chemistry (various case studies) Industrial Chemistry (various case studies, includes polymers and nanotechnology) Medicinal Chemistry (various case studies of drugs and pharmaceuticals) Metallurgy (reactions, extraction and refinement of metals) Introduction to Chemistry Problem Solving Skills Problem Solving in Chemistry Practical Skills Maths for Chemistry Students Classification of Matter Chemical Reactions Physical and Chemical Changes Types of Chemical Reactions Chemical Formula Also see Nomenclature of Organic Compounds Also see Name and Formula (Introduction to Inorganic Compounds) Also see Ligands and Complex Ions Chemical Equations Stoichiometry (Chemical Calculations) Back to the list of free tutorials Organic (Carbon) Chemistry IUPAC Nomenclature of Aliphatic Compounds (IUPAC Naming) Isomers (aliphatic compounds) Stereoisomers Cis-Trans (Geometric Isomers) cis-trans (Geometric) Isomers of Alkenes Optical Isomers Chiral Centres and Chiral Molecules Reactions (aliphatic compounds) Classification of Organic Reactions (introduction) (i) Substitution and Addition Reactions (ii) Elimination Reactions (iii) Oxidation Reactions (iv) Reduction Reactions (v) Polymerisation Reactions Organic Synthesis Reaction Schemes for Organic Chemistry Properties and Uses (aliphatic compounds) Aromatic Compounds Benzene Structure and Properties Back to the list of free tutorials Biochemistry (Biological Chemistry) Biomolecules Biochemical Reactions Applications Back to the list of free tutorials Inorganic Chemistry (Chemistry of Elements other than Carbon) Periodic Table Introduction to Naming Inorganic Compounds Transition Metal Chemistry Transition Metal Properties Ligands and Complex Ions Solid-State Chemistry Silicates: Structure and Formula Zeolites: Structure and Uses Crystallography X-ray Diffraction and Electron Density Maps Back to the list of free tutorials Physical Chemistry Nuclear Chemistry Nuclear Decay Nuclear Decay Half-Life Definitions and Calculations Bonding Gas Laws Thermochemistry (Energy) Applications Fuel Definitions Comparing Fuels Biodiesel Thermodynamics Chemical Kinetics Electrochemistry also see Metallurgy and Industrial Chemistry sections below Advanced Electrochemistry Nernst Equation Equilibrium Acids and Bases (application of equilibrium) Applications Buffer Concepts see also Acid-Base Titrations, Volumetric Analysis, below Concepts of Solutions Solutions Concepts ❄ Water as a Solvent Surface Chemistry Back to the list of free tutorials Analytical Chemistry Gas Tests Gas Preparation and Tests Gravimetric Analysis Gravimetric Analysis ❄ Sulfate in Lawn Fertiliser ❄ Chloride in Seawater (See also applications of equilibrium: solubility) Volumetric Analysis (Titrations) Standard Solutions Titration Techniques Acid-Base Indicators Acid - Base Titrations (direct titrations) Back Titrations (indirect titrations) Back Titration Calculations Conductometric Titrations Acid-Base Conductometric Titrations Precipitation Conductometric Titrations REDOX Titrations Complexometric Titrations Total Hardness in Hard Water Calcium Ion Concentration in Hard Water Precipitation Titrations Precipitation Titration(argentimetric titration) Instrumental Techniques Back to the list of free tutorials Environmental Chemistry Atmosphere Water Back to the list of free tutorials Industrial Chemistry Polymers Nanotechnology Nanoparticles and Nanotechnology Introduction Graphene and Fullerenes Back to the list of free tutorials Medicinal Chemistry (Drugs and Pharmaceuticals) Aspirin (acetylsalicylic acid) Paracetamol (acetaminophen) Ibuprofen Back to the list of free tutorials Reactions Involving Metals Metal + Water Metal + Non-oxidizing Acid Metal + Oxygen Activity Series Extracting Metals Refining Metals Alloys Back to the list of free tutorials naming alkenes and alkynes worksheet with answers. naming alkenes and alkynes worksheet 3 answers. naming alkanes alkenes and alkynes worksheet. naming and drawing alkanes alkenes and alkynes worksheet
