JPMorgan Chase has reached a five-year milestone -- the bank says it now routes all requests from third-party apps and services to access customer data via a secure API, rather than allowing those services to collect data through screen scraping. This was announced by the New York bank on Thursday. "This is a huge win for our customers as it gives them more control over their data and a better view of which apps are using the data and which accounts are being shared with those apps," said Paul LaRusso, head of data aggregation at Chase. Conversation. started in 2017 by signing data sharing agreements with fintechs and data aggregators including Envestnet Yodlee, Finicity, Intuit and Plaid. It also built an API pipeline so customers could share their data more securely than those services In 2020, Chase provided more details about its plans, including a dashboard that would allow customers to access third-party services on a slope. Third-party apps that our customers use to manage their budgets, pay bills, apply for a loan, or prepare taxes. " The bank spent more than two years phasing out screen scraping and migrating businesses to APIs, incrementally as needed happened when the bank signed data-sharing agreements. Customers using a third-party app that requires access to Chase log in and authenticate directly with the bank. The customer can choose which accounts and data they want to share with third parties , and deny access through the control security center panel on the Chase website or app. Chase and other major banks have taken additional steps in recent years to eliminate the last screen. It is one of 11 banks that the Akoya Data Access Network that helps participants manage and allow their relationships to share data]Morgan Chase has reached a milestone in five years of development - the bank says it now directs all requests from third-party apps and services to access customer data through a secure API, rather than allowing those services to collect data through screen scraping. This was announced by the Bank of New York on Thursday. "This is a huge benefit for our customers, as they gain more control over their data and better visibility into which apps are using data and which accounts they share with those apps. Paul LaRusso, Chase's head of data aggregation, said in an interview. Chase began signing data sharing agreements with fintechs and data aggregators in 2017, including Envestnet Yodlee, Finicity, Intuit and Plaid. At the same time, it created an API channel for customers to share their data more securely than sharing their credentials with these services. In 2020, Chase provided more details about its plans, including a dashboard that will allow customers to provide and receive access to third-party services. "It's not pushing a button," LaRusso said. "There are thousands of third-party apps that our customers use to manage their budgets, pay their bills, apply for a loan or prepare their taxes." , which was also phased out depending on when the bank signed data sharing agreements. Customers using a third-party app that requires access to Chase log in and authenticate directly with the bank. A customer can choose which accounts and data to share with a third party and disable access through the Security Center dashboard on the Chase website or app. Chase and other major banks have had other screen-scraping successes in recent years. It is one of 11 banks that owns the Akoya Data Access Network, which helps members manage and enable data sharing relationships.API calls. In early 2021, it was one of the banks to pilot and then join the Enhanced Data Sharing Risk Assessment offered by The Clearing House and risk assessment providers TruSight and KY3P. The purpose of this service was to create standard risk assessments for data collectors. Hasbro has seen a major stock drop due to oversaturation of the popular Magic: The Gathering CCG by Bank of America. (Image credit: Blizzard) After a difficult launch week with frequent server issues (opens in a new tab) and overflowing player queues, Blizzard announced that over 25 million Overwatch 2 players signed up in the first 10 days, tripling the number of players to " day vs. previous daily high in original Overwatch." read the announcement. Choosing the bestFriday's PC Game Deals Normally, it's not that surprising that we're launching a big free-to-play shooter, but the road to Overwatch 2 hasn't been normal. Despite being billed as a brand new game, Overwatch 2 is mostly just an expansion of the original game. Blizzard has spent years trying to explain what the "2" actually means in Overwatch 2, causing confusion and frustration (opens in new tab). Original Overwatch players shouldn't like things like locking new heroes (opens in new tab) to battle passes, introducing expensive cosmetic packs, and requiring new accounts to unlock old heroes within 100 games (opens in new tab).). All the bad news and the internet's general dislike of Activision led many to call it a "dead game" before it even came out. It turns out that a lot of people are playing Overwatch 2, even surpassing the heights of the original game. As we've seen with the relaunches of other previously paid games like Rocket League (opens in new tab) and Fall Guys (opens in new tab), the free version goes a long way. I won't speak for the 25 million of us, but my friends and I were having fun with the key design changes that pissed us all off when we first heard about them - 5 out of 5 are damn good, and the same goes for the new maps, push mode, and new heroes. Our reviewer, Tyler Colp, was more critical so far (opens in new tab), calling Overwatch 2 "a messy sequel that tries to destroy one of the best shooters of the last decade." Decade."
