After processing, they are permanently deleted. Rather not upload your files and work with them offline? Try Sejda Desktop. Same features as the online service, and the files never leave your computer. Click 'Upload' and select files from your local computer. Dragging and dropping files to the page also works. Dropbox or Google Drive files You can pick PDF files from Dropbox or Google Drive too. Expand the 'Upload' dropdown and select your files. Click the 'Compress' button and then 'Download' your compressed PDF. Or, click on the 'More options' button for advanced settings. The compression algorithm does the following: Optimizes images Removes unused fonts and images Images are optimized and saved with a JPEG image quality of 65%. That is perfect for most scenarios. But, if you need it you can configure a better quality for the optimized images (even if the PDF size will be larger). Under 'image quality' select 'Good' or 'Best'. Using the standard settings images are optimized to a '72 PPI' resolution. Working in a scenario where higher image resolution is needed? Click 'More options', then select '144 ppi', '288 ppi' or '720 ppi' as the maximum image PPI resolution. For lower PDF sizes, when having a lot of images, you can convert images to grayscale. Here's an example of a grayscale converted image: To use this option select 'grayscale' as 'image conversion'. Processing each image takes time. A document with many images will take longer to compress. Compressing smaller images has little effect over the overall document size. The larger images are what we want to optimize. Choose 'Faster' and we'll skip smaller images and only compress larger ones, saving time.
