Discussion Starter #1 · Apr 23, 2013 I dont need the responses that say "use the search button" or buy a manual. I used the search button for about 5 pages worth and i came up with nothing so simply. How many quarts of oil does the 660 take. I need to do an oil change for the 1st time. Bought a used 04 raptor. If that was easy then what brand oil. I was going to use Mobil 1 10w40 4stroke oil. The simple answer - 2.5 qts. Unless you have an after market oil tank. Then add .34567 qt. Just a little trick. The easiest way to drain the oil is the tank line that is just ahead of the shifter on the engine case. Warm it up and then use a 19mm wrench to remove the line, and the tank and the engine drain all at once. Discussion Starter #3 · Apr 24, 2013 The simple answer - 2.5 qts. Unless you have an after market oil tank. Then add .34567 qt. Just a little trick.. The easiest way to drain the oil is the tank line that is just ahead of the shifter on the engine case. Warm it up and then use a 19mm wrench to remove the line, and the tank and the engine drain all at once. I have to thank you for the quick and respectful response. I am a member of alot of forums and there are so many out there that are quick to be no help at all. Just trolls. So that bud. Hey is the oil i picked ok to use? Anything that says atv will be fine. The biggest issue is the wet clutch, otherwise you could run whatever you want. Other more knowledgeable people have been around that say if the API circle reads Energy Conserving, you don't want to run it as it has 'friction modifiers' that can make your clutch slip. Discussion Starter #5 · Apr 25, 2013 DONE. It took exactly 2.5 quarts. I used the valvoline 4 stroke motorcycle oil. Thanks what kind of oil does a yamaha raptor 350 take. what kind of oil does a raptor 350 take. what oil does a raptor 350 take
