Wow classic leveling guide dwarf hunter

Wow classic dwarf hunter leveling guide.

The best individual pages to read through are as follows. We also listed where you can find Bow Weapons to make sure you are doing enough damage maximize the efficacy of your grinding. World of Warcraft Classic Hunter Leveling Guide 1-60 Hunter Leveling Locations Guide This class is one of the fastest, but you can only level up fast if you are leveling against the right monsters at the right level to gain the full 100% XP Reward. In fact, for most classes, leveling with a partner is actually better than leveling solo. The DPS Hunter Rotation guide is where you can read on how to optimize your PvE damage and how to prioritize your abilities. Arcane Shot is an expensive ability and should be used sparingly to deal more burst damage when you have the Mana for it. This means that you can attack a target with your bow, immediately turn and attack a different target with your melee weapon, and then turn back to use your bow once the Auto Shot's downtime is finished. If your bow has a 3.0 second attack speed on it (shown in the tooltip), then you will shoot an arrow every 3.0 seconds while attacking your target. For AoE, Multi-Shot, Explosive Trap, and Volley can all be great tools for killing multiple targets, but you always have to be careful to make sure you are not the one picking up threat; either your pet or a party member should be holding threat if you are trying to AoE. Once you get the melee attack off, you would switch your target to boar 2 and use an Auto Shot. Read our full guide on weapons by clicking the link below. Once it is back up, you will want to stand still for another 0.5 seconds to get another Auto Shot off. However, some professions are very useful for either leveling or at Level 60, and can be worth the time investment while leveling. Downtime is the time that you are forced to wait to regenerate health and Mana in between killing mobs. Auto Shot in Classic is very different from modern WoW, however, and is more like a spell that needs casting. If you spend too much Mana too quickly while killing mobs, you will end up having to drink too much, which adds significant amounts of downtime, slowing down your overall leveling speed. Thus, you should not train every rank of every skill. Hunter Quests guide 9. Hunter is the best solo class in the game, so leveling with one or more people will be neutral at best. Hunters are widely considered to be the strongest solo leveling class in Classic WoW because they excel at all three in unique ways. 2. Our PvP Hunter guide is where you can find PvP builds for all 3 specializations, as well as various tricks and tips for PvP combat. This process repeats back and forth exactly like that until boar 2 enters your dead zone and you can no longer shoot it. So, if your weapon speed is 3.0 seconds, but you have 40% increased ranged attack speed from Rapid Fire, then the time between Auto Shots will be reduced by 40%. Hunters see our guide below for more details. The last portion of your time will be spent in combat. Beast Mastery Hunter leveling guide Marksmanship is viable, but you will be more vulnerable to doing too much damage compared to your pet, making it harder to let your pet tank enemies. The DPS Hunter Talent builds guide has the best builds for Level 60 covered. 4. Once you learn it at Level 20, it is important to remember to activate Aspect of the Cheetah whenever you have to move more than a few steps. Most of the damage Hunters deal is with a ranged weapon, with their melee damage being significantly weaker. Weapon Options for Leveling Hunters in WoW Classic Getting upgrades on any piece of gear will help the leveling process, but the single most important upgrades to look for are weapons. DPS Hunter Stats guide contains detailed information on all Hunter stats, including a list of their priority for damage dealing. Professions While leveling If your goal is to hit Level 60 as fast as possible, it is not recommended to pick up professions while leveling. Kiting before Level 10 is extremely important because it allows you to do as much damage as possible before the target enters the "dead zone." Hunters have a minimum range of 8 yards on our ranged abilities and Auto Shot. Hunter is the exception; your leveling speed in a group as a Hunter will not be better than by yourself, if you have experience leveling. The goal is to kill mobs quickly while spending little Mana and not losing health. You start by casting an Auto Shot on your target, which takes 0.5 seconds (the animation time). It is also worth noting that this tactic can be dangerous, and you can easily pull too many enemies and die if you are not being careful. 10. This 0.5 second "cast time" for Auto Shot is consistent for whatever weapon or weapon speed you end up using. Hunters are unique in that they are the only class that has two separate basic attacks, both of which have a short "animation time" with down time in between each attack. Killing targets quickly is all about getting as many Auto Shots off before they make it into your dead zone, and you are forced to use melee attacks and Raptor Strike to finish them off. We have a list of locations to speed up the process of levels 1-60 with the Hunter class, this will help the leveling process feel easier overall. Survival Hunter leveling guide 3. For Hunters, this means moving during the down time between Auto Shot hits. Our Gear guide for DPS Hunters lists all the optimal pieces of gear that you will want to farm at Level 60, in order to optimize your damage. For a Hunter, this means opening with Hunter's Mark, then keeping up Serpent Sting while letting your Auto Shot do most of the damage. In practice, this translates to a slightly different goal, which is to always be using your Auto Shot. That being said, grouping with friends could help them level faster while not slowing you down much, which could be worth doing if you want to help them out. Additionally, you will get Aspect of the Cheetah at Level 20, which will cut down your travel time until you get your first mount. Inside that 8 yard zone, you cannot use your ranged weapon to attack or cast abilities on a target. Concussive Shot, Wing Clip, Freezing Trap, Freezing Trap, and Scare Beast are all valuable disengage and crowd control tools for both PvP and PvE. Getting your first mount at or close to Level 40 can reduce travel time significantly, which will greatly improve your leveling speed. Kiting is when you move between attacks to put more distance between you and your target. 7. You will spend a significant amount of time traveling in your journey from Level 1-60, which is why movement speed increases like your mount are very important. 2019: Page added. Immediately after the Auto Shot, you switch back to boar 1 and melee it again. After getting the shot off, you are free to move backwards or use other abilities until your Auto Shot comes back up. Once you get your pet at Level 10, you will notice your kill speed increase and your downtime drop drastically. 6. Leveling in a Group as a Hunter Contrary to popular belief, leveling with a partner or as part of a group is not a terrible thing. 5. At low levels, this usually looks like Auto Shot -> Move -> Auto Shot -> Move, and so forth. This Bow section will apply for both Horde and Alliance Factions. DPS: 2.4 - Hornwood Recurve Bow, Bought at Bowyer Vendor Level 3 Requirement DPS: 5.8 - Laminated Recurve Bow, Bought at Bowyer Vendor Level 11 Requirement DPS: 7.5 - Reinforced Bow, Bought at Bowyer Vendor Level 16 Requirement DPS: 19 - Master Hunter's Bow, Quest Reward for "Big Game Hunter" DPS: 28 - Verdant Keeper's Aim, Quest Reward for Maraudon "Corruption of Earth and Seed" Note: These are the recommended Alliance Hunter Leveling Locations. Lvl 20-26 - Mosshide Gnolls - Mosshide Fen, Wetlands Lvl 22-32 - Ghouls & Skeletons - Raven Hill Cemetery, Duskwood Lvl 32-38 - Hammerfall Peons - Go Shek Farm, Arathi Highlands Lvl 35-40 - Mirefin Murlocs - Dreadmurk Shore, Dustwallow Marsh Lvl 39-44 - Deathstrike Tarantulas - East of Stonard, Swamp of Sorrows Lvl 42-46 - Skullsplitter Trolls - Ruins of Zul'Mamwe, Stranglethorn Vale Lvl 43-51 - Southsea Pirates - Lost Rigger Cove, Tanaris Lvl 46-51 - Jade Oozes - Skull Rock, Hinterlands Lvl 51-56 - Ghouls & Skeletons - Sorrow Hill, Western Plaguelands Lvl 52-56 - Arena Spectators - Blackrock Depths Dungeon, Searing Gorge Lvl 52-58 - Zombies & Skeles - Dalsen's Tears, Western Plaguelands Lvl 53-60 - Whip Lashers - Dire Maul East Runs, Feralas Note: These are the recommended Horde Hunter Leveling Locations. Once inside that range, you would immediately use a Raptor Strike to melee it. Melee weaving means that you weave those melee attacks on the closer targets in between Auto Shots on new targets that are farther away. If your goal is to level quickly, minimizing downtime is just as important as maximizing your damage. Bow or Gun upgrades can greatly improve your leveling speed. We propose builds for all specializations, with a focus on Beast Mastery for solo play and Marksmanship for raiding. Important Hunter Quests in WoW Classic Every class in WoW Classic has important class-specific quests that allow them to gear up and learn new active abilities, which are often critical to the class. Serpent Sting and Arcane Shot make up the bulk of your ranged damage, combined with your Auto Shot. By using your pet to tank, you can kill enemies with Serpent Sting and Auto Shot. While this can be difficult to do due to the quick target swapping required, it allows you to effectively kill multiple enemies at once. This is why using your highest damage rotation is not always the best idea. For the remaining 2.5 seconds, you can move, use other abilities, or do whatever you want without costing you any potential attacks. Show more Show less You can repeat this process over and over, effectively killing 2 to 3 enemies at the same time. Again, it is important to figure out your most optimal rotation based on your Mana pool and what skills you have. As you kite around an area with enemies, you should always be using your Auto Shot on a target from the moment you first attack to the moment it enters your dead zone and you can no longer shoot it. First Aid is a must have profession at max level due to Hunter's lack of self healing, and learning it early on can be useful while leveling. As Beast Mastery, your pet will take less damage and deal more damage, allowing it to hold threat more easily. 2019: Improved presentation of talent picks by level. Once the target is within the minimum range you can finish it off with melee attacks. We have a Talent Skill Tree guide of what we consider as the best spec to use and locations you should be grinding mobs to gain the most XP for your level. Gold is going to be scarce while leveling and it is incredibly important to be saving gold for your first mount at level 40. Marksmanship Hunter leveling guide Survival is the worst of the choices and will be outperformed by both other specs in all areas. At this point, boar 1 should be dead or close to dead, so you can finish it off with more melee attacks as you start to use Auto Shot on boar 3. If you let your pet tank and let Auto Shot be the bulk of your damage, you will not have any issues. Feign Death is one of the single most important buttons in your toolkit and is a unique mechanic to Hunters. This allows you to kill enemies without spending much Mana and only your pet losing health. The Level you should be before you enter that specific location will be indicated to left in a Blue Color for Alliance [Lvl 35-39] and Orange Color for Horde [Lvl 35-39] the Mobs you are looking for Bolded [Mob Name] Bow Weapons we recommend using to Level Up Faster as Hunter in WoW Classic. Foreword While leveling, your time spent can be put into three categories: combat, downtime, and travel. Hunter Abilities Hunters have lots of different abilities to learn, some more useful than others. Choosing Your Leveling Spec While we propose leveling builds for all 3 Hunter specialization, Beast Mastery clearly is the best leveling spec for Hunter. How to advance as a Hunter at Level 60 Well done on hitting maximum level in WoW Classic! Now that leveling is over, you can learn more about level 60 gameplay by reading our DPS Hunter Guide, which covers every facet of gameplay at 60 in detail. Use this any time you need to get out of a bad situation and need to leave combat or drop threat. Changelog 29 Aug. You will still need to be stocked up on ammo and making sure your pet is up to snuff for the location you are going to go grind. Recommended Talent Build for Leveling Up The Hunter Class Strength and Weaknesses Below we list some of the Pros and Cons / Strength and Weakness of Leveling the Hunter Class in general. Strength - Easy 1-60 Leveling. Strength - Easy Solo Leveling with Beast Mastery. Weakness - Cannot self heal. Weakness - Uses Ammo and Food. You can view other Class Leveling Guides by Clicking/Tapping the links below. All Leveling Guides 1. Beast Mastery also has important movement speed talents, along with Bestial Wrath, an extremely powerful damage cooldown. Part of maximizing your damage on a Hunter is never "clipping" your auto shots, which means ensuring that you are always shooting as soon as it is back up. This is where Hunters can struggle the most, due to their low melee damage. 4.1. Recommended Skills to Upgrade as a Hunter Track Beasts Raptor Strike Aspect of the Monkey Serpent Sting Arcane Shot Hunter's Mark Concussive Shot Revive Pet Aspect of the Hawk Track Humanoids Mend Pet Wing Clip Scare Beast Mongoose Bite Multi-Shot Aspect of the Cheetah Disengage Freezing Trap Rapid Fire Frost Trap Feign Death Explosive Trap Aspect of the Pack Volley If you are playing on a PvP server and are concerned about fighting other players, you can also choose to get Viper Sting for fighting casters or Flare for fighting Rogues and Druids. Welcome to our World of Warcraft Classic Hunter Leveling Guide, here you can find the Best Talent Build to use while leveling up from 1 to 60 with the Hunter Class. You start by shooting boar 1 while kiting backwards, using Auto Shot as much as possible until it enters your minimum range. You should always be on the lookout for potential ranged weapon upgrades which have a higher DPS than your current weapon. Aspect of the Cheetah is a great ability to help with this, allowing you to run 30% faster whenever it is active. 4.2. Auto Shot Auto Shot is your most basic attack and your primary source of damage. Most of the time, you will want to use your most efficient damage rotation, with the goal being to maximize damage while minimizing your Mana spent. It is important to have an idea of what skills are worth having and what you can live without. Travel time is when you have to move between quests, towns, or zones. 5.2. Advanced Tactic: Melee Weaving If you are looking to push your leveling speed to the limit, then melee weaving is the skill to master. The most important thing is that these attacks, your melee auto attack and your ranged Auto Shot, do not share downtime. As an example, say that there are multiple boars that you would like to kill. If you keep your pet fed and use Mend Pet frequently, your pet will stay healthy and loyal, allowing you to keep fighting with little to no downtime between enemies. However, Auto Shot does not take a full 3.0 seconds to shoot; it only requires that you stand still and do nothing else for the first 0.5 seconds of that 3.0 second window. Goldmaking Guide for Hunters is a page with details on where / how to farm gold quickly as a Hunter when you are Level 60. Herbalism, Mining, and Skinning all are great choices for making gold towards your first mount, and can also be useful for helping to level other important professions later on, such as taking Mining to help level Engineering. The key to leveling before you get your pet is proper kiting while using Auto Shot. 5.1. Kiting as a Hunter From Level 1-10, you will have to kill enemies without your pet to tank them. Beast Mastery as you might expect, is one of the best for not only leveling from 1 to 60, but you can level easily playing solo thanks to the help of your pet. We do not recommend it for leveling, but if you are up for a challenge, we have a guide for it. Hunter Weapons guide 8. 12 Jun. It is also worth noting that Auto Shot is affected by Haste. Leveling Strategy as a Hunter As stated above, time spent leveling can be broken into three distinct parts: travel time, down time, and combat. You can also cast other shots like Serpent Sting and Arcane Shot while moving in between Auto Shots for extra damage.
