Bad words that start with letter r

The word "retarded" does not disturb my daughter. In fact, there's not much that bothers her. Not the pain of ear infections. Do not skip birthday parties and trips to the park because they are not accessible. Don't eat broccoli for dinner. This is partly because it is easy to go by nature. But, it is also partly because a deletion in your genetic code makes you unable to understand much of what happens in the world around you. My daughter doesn't know that when you use the keyword, you're saying she's stupid. He doesn't know you're saying that you don't think he's worthy of a child born without disability. But even if you don't know, I know. I know you're judging her and hurting her. You are perpetuating the idea that individuals with disabilities do not deserve to be full members of society. You are strengthening the idea that they do not deserve the same respect and the rights granted to others. This makes everything too easy to turn the other way when children with INTELLECTUAL DISABILITY are bullied at school, cut funds very need for medical programs for people with disabilities, to slash the budget for special education programs. It also makes my daughter invisible, not a person to consider. After all, she is not the sweet girl who has a smile for everyone, who radiates pride when her body usually not cooperative allows her to take some unassisted steps, and who delights in the examination of the pages of anyYou can find. When using the word r, she is not a playful girl, a person to love. She is just a "retard". For these reasons and many others the keyword gives me enough trouble for both. I know that many of you are rolling your eyes, thinking that this is a common expression and that I should lighten. I'm sure that's what mom said she was "so late to get lost" on the street for a party in a room full of four-olds this weekend thinks. It is also what my friend told me that he was asked "retarded questions" to a presentation last week thinks. It is such a thought that allows the continuous marginalization of individuals with disabilities. It is such a thought that leads to playgrounds and schools under construction that are not accessible to all. Which leads to further marginalization of children like my lord. Until we change this thought, and our language, too many will continue to think about people with disabilities not as people who are precious members of society, but as something less. Something "retarded" that can be easily pushed aside and mistreated. It's not something I can take lightly. It's not something everyone should accept. If you appreciate living in a diverse and inclusive society where everyone is valued, please think before talking — and talk at any time you hear the word r. We will all be better for this. This post comes from the TODAY Parenting Team community, where all members are welcomeand discuss parental solutions. Learn more and join us! Because we're all together. Okay. You won. All these years of hearing people explain to you, often very passionately and eloquently, that the word "R" is malevolent has not changed its mind. It doesn't matter if you're describing a situation, yourself or someone else. It hurts. But I doubt another half-aged suburban mother's statement will marry you. Yes, you're right when you say we live in a free society, and you have the right to say everything you want. You certainly have the legal right to use a word, even if you demeate people whose only sin is that they have to work one hundred times harder to do things that you take for granted. Things like reading, talking or working. Since you were born lucky enough to do these things with ease, you don't have to worry about anyone who teases you. Then why should you worry about someone else's feelings? Parents like me screaming when someone gives our children a bad look or throws the word R to them are simply hypersensitive. Since your child has no problem that would make someone else decide to use that word to describe them, it is not your problem. Life is complicated and quite divided these days without people like me offending at any time you should happen to use the word R. After all, you are just describing a frustrating situation, or another driver. You're just trying to live your life. You don't need me orotherwise what to do. And yes, the word r has long been. once the medical term oato to describe a person who is disabled to development. and yes, it is in the dictionary. of course, so are the words, dungaree, galoshes and percolator. But what do I know? Maybe you still like to smell them to describe jeans, rain boots and coffee makers. life would be much more beautiful if people would return to the way things go to be in the "good old times". Then you didn't have to worry about meeting an amazing person like my daughter, or her friends. teenagers and young adults who are happy and proud to go to a store and pay for something all by themselves. or hold down a storage shelves job. you don't have time to smile and meet someone again, or give a human friend a minute or two more if you should meet them to help you plunder shopping or ring your purchase. You're busy. You have important things to do. I realize you might be less interested in what I think, but I'm deeply sorry for you. marginalizing a group of people you miss knowing some truly exceptional human beings who have gifts and abilities that are clearly beyond your understanding. Not to mention, you seem very mean and witty. But you're right. This is America. So, even if I wish we could delete the word from our vocabulary as it is obsolete, inaccurate and painful, people like you will never leave it. Okay, I'll talk to you.piece was first published on The Special Needs Nest This post comes from the TODAY Parenting Team community, where all members are invited to publish and discuss parental solutions.
