(Support Devices: 6S, 6S PLUS, 7, 7 PLUS, 8, 8 PLUS, X, XS, XS MAX, XR (iOS 13), 11, PRO 11, 12, 12 MINI, PRO 12) \* You can set Live wallpaper through "Settings> wallpaper Live . Contacting Base Teammail: intolive.ios@imgbase.mefacebook: Sep 21, 2021 version 3.4.11 . Support for iOS 15 bug fixes and improvements dell'importabilità make your special lock screen with the app Itolive. Itolive the app is a powerful tool to make the live wallpaper very easy. If you enjoy Itolive, please leave reviews. this will be very helpful for us! I got this app thinking I could make any kind of wallpaper and I could. There was only one problem that could not support my type iPhone and wish it could, and if he could give him five stars but since I can't use the rating is low. I have the iPhone XR and this app does not support so I am disappointed because I'll give a warning that could not support my phone. He gave Warning after I received the app and I'm saying why I'm not only said in the description. So yes, totally I love this app if only it worked on iPhone XRS but yeah, maybe you all can try to solve it. Please and thank you, but this is a good app just do not waste your time to take it if you have an iPhone XR. Hello again! Please be informed that now supports iPhone XR finally the card live wallpaper with iOS 13. Please upgrade your iOS and try it again. I hope this information can help you. Thanks! So I downloaded this app, thinking it would be pretty nice to know, as if I could change my live photos and change the background and do interesting things like that, but when I came in, literally almost everything was closed in BC It 'really was bothersome. For example, I wanted to change this picture of my to make the background a fantasy blue pattern that I found, but guess what, it was locked! And there were only three that were open and they are ugly. But here, here's the thing, I used one of the bad background because I were the only ones open, so then I pressed "It', . Then I pressed " . Do not repeat . Why everything else, take it was blocked. Who could guess. Anyway, so I pressed "Save Live Photo . I went to my camera scroll and guess what! Actually went well! JUST KIDDING! Apparently I downloaded the app for ... nothing! Everything he did was to make him a live photo, but it was already a live photo. THE APPLICATION. DOES. ABSOLUTELY. NOTHING. I think it's clear to say that it's a complete full life WEATHER. DO. NOT. DOWNLOAD. This app. Hi, thank you for using ITOLIVE. Sorry for your inconvenience. Some of the background items are only available in ITOLIVE Pro, but we understand your point. Because many users have requested other free background templates, we plan to provide free shows. Please check our next updated version 3.3.10. I hope this can help. Thanks! I received the app because I had some changes I wanted to do my wallpaper, but I repented once I tried to make a background. You have to buy almost everything about the app, which removes the free aspect. I have honestly tried about 3 different changes and nothing has changed, and even the limit of time is ugly. You can only have a certain period of time for a background unless you buy everything. Also, bigger is your phone screen, changes are messed up. I have an XR, and when I tried to use a background, even if I made it smaller, the wallpaper would be the actual size on my screen because it was in the app. Cut the corners and makes the wallpaper larger. Given the 1-star 1 star app, but I was able to choose about 1 or 2 different things in each category during the change. Overall, 2 out of 5 and you shouldn't buy if you don't want to spend money. Hi, we're sorry for your inconvenience. Provide a better service and keep our app, some features are only available in the Pro version. We ask your generous understanding. We will continue to improve our app. Also, we would like to inform you that the format of live photos expands the photographic area of about 8% when you play. And that's why the wallpaper was more big than the photo or video. If you have further requests, let us know. Thanks! Puedes Play the lives photo en la pantalla bloqueada, but no en la pantalla de Inicio. Para reproducir lives photo, mantén presionada Bloqueada pantalla. Gracias Por Tus Comentarios. Live Wallpapers may not be like fashionable as when Apple initially introduced its live photo function together with the iPhone 6s. But in case you want to transform your favorite movie into a moving background for your phone - there is an app for what Apple supports movement movement wallpapers Devices, users are kept video convert and animations to their own Live Photo Company . Available for free, intolive is a nifty application for iOS that allows you to easily transform any video or gif animations into a live wallpaper for your iPhone. Here is how you can do that: download the application from App Store Here open Intolive and upload The clip of your Choice. Right of the movie and choose the duration for Live Wallpapers save the video like Photo Once Live You . Made this, all you have to do is go to settings and update your background with you . Live Photo VE as soon as generated. In addition to this, the application is also available with its own editing tools in case users want to change the length and duration of their live wallpapers. One to keep in mind is the version Free Intolive limits the duration for live five-second wallpapers. Those interested in making wallpapers can be obtained the iteration Pro the application, which extends this option for a maximum of 30 seconds. In all honesty, the application has been around for at least a couple of years to this side . But it could still come in profit for those who try to bring a little more movement to their iPhone background. You can download Intolive from Here. Meanwhile, you should find the video / gif you want to set up as new Live Giphy to you can press the animation in question for a long time to save it directly as Live Photo; In this way you don't have to rely on Intolive to make the same. Now to try this, the children: see what I did pic.twitter.com/t29hddajc4 . miracle woojin # ohmygirl4hwin (@miraverse) 4 February 2018 wallpapers of the Our phone, the images displayed on our lock screen and our homescreen, say a lot of us. These are, after all, the images we see more than any other, every time we look at our phones, but if a photo says more than a thousand words, a video can say more, so you can use a video clip like your iPhone wallpaper is a great way to customize your phone, and while you can't use a real video as a background on your iPhone, you can use a live photo animated, a file that is easy to create with The Intolive app. Note, however, that not all iPhones support the photo live setting as moving wallpapers. If you have one iPhone or iPhone XR, you can set up a photo as a live background, but it will no longer be Move. Read: How to use the Live Photo function on your iPhone to take motion-enhanced photos how to put a live Photo like your iPhone wallpaper. 1. Start the settings application and scroll to and touch "Wallpaper". Open the Wallpaper menu in the app settings. Steven John / Business Insider 2. Touch "Choose a new background." 3. Tap "Live Photos" and select the file just created. Make sure the "Live Photo" option is highlighted. Be sure to select the "Live" option before choosing your photo. Steven John / Business Insider 4. Touch "Set", then select "Set screen block", "Home screen set," or "Set both". To enjoy the new live wallpaper, it's enough to touch and hold a finger on the screen for about a second and is suddenly animated, so much for the emotion of those who see it. How to create a Live Photo from a video with Intolive. 1. Download the Intolive application from the App Store . The basic version is free. 2. Launch the application, allow you to have your photo library, and then go to the "Video" tab and select the file you want use. 3. On the next screen, you can add a filter, slow down or accelerate the video, and adjust the cursors on both sides of the clip to change yours The live photo version can be up to five seconds long. You can change the live photo version of the video in different ways, including length change. Steven John / Business Insider 4. Tap "Make" in the upper right corner of the screen, then wait as the live photo is created. Note that you will have to close some ads on the free version.
