So which microSD card should you refer to the new Galaxy S20 Plus or Ultra? While any modern microSD card will technically work, there are a few things to consider. First, the faster the card, the better the performance. Second, you'll need a card with a reputation for quality. While there are many well-known brands, we mostly recommend Sandisk and Samsung for their combination of price and reliability. Sandisk MicroSD cards are one of the first companies to introduce A1 rated MicroSD cards while these Class 10 Class 1 MicroSD cards are some of the best options if you are looking for fast apps. The 16GB and 32GB versions of the cards offer maximum transfer speeds of up to 98MBps, while the larger memory versions go up to 512GB at 100MBps. Samsung MicroSD Card Samsung Evo Select MicroSD cards are 10 UHS 3 cards class 3 with capacities ranging from 32GB to 512GB and you can achieve read and write speeds of up to 100MBps and 95MBps respectively. Read more reviews Compare reviews that are interested in whether the new Galaxy S20 phones will have upgraded storage space? Fortunately, we will create a detailed guide for you to explain which Galaxy S20 has a MicroSD card slot. The answer is pretty simple: every configuration of the Galaxy S20, Galaxy S20 Plus, and Galaxy S20 Ultra comes with microSD card slots. This means you can add 1TB to the Galaxy S20, Galaxy S20 Plus and Galaxy S20 Ultra you choose. However, all phones have a large amount of internal storage, so you must be a serious expert that you need a lot more storage space. The Galaxy S20 comes with 128GB of storage by default. The Galaxy S20 Plus and Galaxy S20 Ultra are available in 128GB and 512GB. Related: Best Galaxy S2020 is the latest series of Samsung's best phones. Samsung introduced the Galaxy S20, Galaxy S20 Plus, and Galaxy S20 Ultra earlier this week. The phones replace last year's Galaxy S10 as the company's top offering and include numerous technical upgrades. Highlights include improved 5G connectivity, a redesigned rear camera configuration, and a new AMOLED display with a 120Hz refresh rate. We've only had the chance to play a quick game with the new phones, but our initial impressions are positive. It looks like all three are important upgrades for the S10 family, and we wish the Galaxy S20, Galaxy S20 Plus, and Galaxy S20 Ultra lead more in depot tests. If you want to take a look at the hardware of the device, be sure to check out our Galaxy S20 hands-on checkpoint. We expect other new generation smartphones to be released in the coming months. Google should launch the New Pixel 4A and Pixel 4A XL in the near future. Huawei is also due to reveal the new P40 series before MWC 2020 (Mobile World Congress) in Barcelona at the end of the month.
