2018/1/4 - Show activity on this post. I am pretty new to react native and try to run an app with react-native run-android so without expo. The app installs successfully but it crashes immediately without errors. I've created the app with react-native init myapp. When I try to run an app with Android Studio everything works fine. 2018/1/4 - Show activity on this post. I am pretty new to react native and try to run an app with react-native run-android so without expo. The app installs successfully but it crashes immediately without errors. I've created the app with react-native init myapp. When I try to run an app with Android Studio everything works fine. 2020/5/21 - When I launch the app using the command "react-native run-android" on Devices and Emulators with Android API level 21+ App is launching. But for devices less than API 21, the app crashing on launch. I have specified in android gradle minSdk version to 16. 2020/3/30 - When I run app in debug mode, it works fine, but when i install release mode it crashes immediately after start. I didn't find a fix yet. @GabeSechan I'm not so familiar with android ecosystem but according to what I understood, I tried adding -dontobfuscate to proguard-rules.pro file. file. 2018/4/9 - android app is crashing when app is launching react-native version 0.53.2 Affected OS Android OS Version Nexus 5X API 25 or Pixel XL - 8.0.0 react-native-device-info ^0.21.4 Current behavior Pls find below the steps i followed npm instal... 2020/11/21 - Ever since I started programming in React Native with Expo, I have been using an ios physical device together with Expo app. I never had any major issues. Now i wanted to start fixing any bugs on android, but when running the Expo app on my android physical device the Expo app crashes (shuts down) while downloading bundle. 2018/12/4 - If you tried to generate android release APK by following guide provided in official site of facebook react native, and found your app is crashing on device up on launch, then you are 2021/5/20 - deleteyour-react-app/android folder completely - then Discard Changes' in git so you get the original files back re-run npx react-native start and npx react-native run-android Share 2019/5/14 - After update my project to the latest version of React-Native, the APK start to crash on launch, so I create a new project with the latest version o RN, without any code and simply run the react-native run-android - variant-release and L... 2020/5/21 - When I launch the app using the command "react-native run-android" on Devices and Emulators with Android API level 21+ App is launching. But for devices less than API 21, the app crashing on launch. I have specified in android gradle minSdk version to 16. 10 小时前 · 3 1. 1 bronze badge. 2. A crash log like this won't tell you much in a React Native app where the crash is related to the JS code. "I didn't make any significant changes to the app, other than adding 2 small packages and some styling changes."
