Instruments is a community for people who like to do things. Come and explore, share, and make your next project with us! Instruments is a community for people who like to do things. Come and explore, share, and make your next project with us! The administration of social security (SSA) fill in a list of the names of the most popular children in the last 100 years. This represents the most complete image of the most common names in the United States. The following list includes male and female names - classified from 10 to 1  $\hat{A}$   $\hat{e}$   $\hat{a}$   $\hat{r}$   $\hat{a}$  as well as the most common surnames based on the 2010 census. In 2010, 1,060,159 people in the United States had the surname Martinez. This is. It was the tenthmost tenth day of the country. Meanwhile, the tenthmost name in the last 100 years was Charles (2,144,937 or 1.23% of 173,916,919 male births) and Margaret (993.136 or 0.59 Percent of 169,671,039 female births). The most common surname was also Hispanic. There were 1,094,924 Rodriguezes in 2010. And of all newborns born between 1918 and 2017, 2,174,023 were Thomases. A total of 996,554 girls was named Sarah. Two common names 'J' are the most popular eighth in America: the biblical Joseph and Jessica. These accumulated for 2,394,205 and 1,043,436 names of children, respectively. Meanwhile, in the 2010, 1,116,357 people had the surname Davis. A sum of 2,487,993 Richards amounts to 1.43% of you TTI Babies born between 1918 and 2017. The 1,106,071 susans represent 0.65% of the total births of the baby. As for Millers, there were 1,161,437 of these registered in 2010. Another Hispanic surname arrives at number six. There were 1,166,120 Garcia in the 2010 census. But during the last century, there were more than 3,557,293 Davids and over 1,410,059 Barbaras. I love them or detest it, the British royal family has long been inspiration for children's names. There were 3,662,399 Williams born between 1918 and 2017 and 1,443,415 Elizabeths. Good luck keeping up with the Jones, though; There were 1,425,470 in 2010 in 2010. The most common fourth surname in 2010 was brown, with 1,437,026 occurrences. Michael and Linda were the fourth names of the most common children of the century before 2018. There were 4,315,462 and 1,448,097 of these, respectively. Robert and Jennifer are both quite versatile names. The minutes include Rob, Bob, Robbie, Bobby and Jen, Jenna, Jenny and Jennie. It could be why they are so popular. Of all newborns Nati 1918-2017, 4,571,203 (2.63%) were called Robert, while 1,465,928 (0.86%) of all the girls were called Jennifer. 1,625,252 people had the surname Williams in 2010. Ok, so you may not find many John Johnson; But both take the number two points. A total of 2.64% of newborns (4,594,023 born in the last century) was given the name John and the last census recorded 1,932,812 surnames like Johnson. 1,564.163 (Pat, Patty, Trisha, Trixie) represent 0.92% of all female births between 1918 and 2017. No surprise here: Smith is by far the most common name in the United States. In the Census, 2,442,977 of them were counted. James and Mary are the most common names. But while there were only 198,931 other James of John Born 1918-2017, there were 1,829,293 more Mary than the patricians. The 3393,456 females called Maria accumulated for 2% of all the births of the girl. Ammonia has a boiling point of -33,35 degrees Celsius or -28.03 degrees Fahrenheit, which is why it is usually found on Earth as a gas. Pure ammonia in liquid form is stored under extreme pressure to keep it from evaporation. The ammonia found in home products is often combined with water, which keeps it in liquid form without such pressure. This is called Aqua Ammonia or ammonium hydroxide. The most common source of ammonia is the Haber-Bosch process. This reaction combines the nitrogen and pure hydrogen under pressure and high pressure temperature and temperature with a catalyst, such as iron, to create ammonia.m ammonia as fertilizer around 90% of ammoniac manufactured as fertilizer to help crops They grow. Farmers apply liquid ammonia through large tanks to the ground in their fields. To maintain ammonia from evaporation, the machinery is used to bury the liquid under four to eight inches of land. This maintains ammonia from the evaporation in the air and creates ammonium, which in turn acts as a source of nitrogen for plants. Combining it with other chemicals, ammonia can also be transformed into fertilizer as salt or as Aqua Ammonia. Ammonia as a cleaning agent because the ammonia is good to break the dirt, it is often combined with other chemicals for use in cleaning materials. Its capacity to evaporate rapidly helps to avoid streaks caused by windows detergents. Here are just some of the ways in which ammonia can be used at home: to clean the electric ovens and fat metallic racks and removal of the soap scum like a cleaning glass for the repellent moth for the removal of the floor and the wax removal and cleaning of the upholstery, the smell removal of paint to clean objects and brass jewelry shoe clean and clothing animal bracing repellent for trashboard the ammonia in the ammonia of food occurs naturally in foods that people They eat every day, including milk, meat, fruit and vegetables. Ammonia compounds are used to help baked products increase the oven and control chocolate and chocolate acidity. Ammonium chloride, a salt made with ammonia, can be found throughout the bread and ravioli in box to soft drinks. Furthermore, ammonium hydroxide is used to clean meat and kill harmful parasites and bacteria. Ammonia security ammonia is harmless in many forms, but it can still be dangerous. Ammonia can irritate the skin, eyes and lungs, making it important to follow all the cleaning instructions supplies that include ammonia. Ammonia mixed with bleach creates toxic gas called chloramin that can cause chest pain, nausea, shortness of breath, and even pneumonia. While ammonia in everyday food is safe to eat, consume cleaning of cleaning materials that contain ammonia can cause internal burning problems and stomachs and should be avoided. If no other ammonia product is consumed, contact the national poison control center at 800-222-1222. Although ammonia is not usually flammable, it can burn at high concentrations, and the presence of oil or other easily burned substances can make it more likely. Ammonia can corrode zinc, copper and many other alloys. Because of what, ammonia must be stored in special containers made of steel, iron or Types of plastic or rubber. Finally, ammonia can combine with mercury to create a dangerous and explosive compound. By Christene Barberich as many successful history, the designer of the Pade Vavra jewelry has started in the garage. "I worked there for years," says the L.-based designer. "Finally, I had difficulty finding a place for a stapler, not to mention a computer." This is necessary to expand Pade LED and the assistant of him, Parrish, to a larger space in the center of Los Angeles. Loft-like with columns, in the middle of Little Tokyo and Chinatown and the other showrooms located in the city's fashion district, her she The work area sounds more like a New York environment compared to La, but spend time with the unforgettable creations of the designer, and realizes his approach to the creation of jewelry is not typical. "I designed jewelry on a subconscious level at  $\epsilon$   $\hat{A}$   $\hat{A}$   $\hat{A}$   $\hat{f}$   $\hat{a}$   $\hat{e}$   $\hat{e}$ ,  $\hat{a}$   $\hat{r}$   $\hat{A}$   $\hat{Y}$   $\hat{A}$   $\hat{e}$   $\hat{a}$ ,  $\hat{r}$   $\hat{A}$   $\hat{A}$   $\hat{f}$ , my life," says Pade. "Taking shells or stones and friendly together." After a short time studying interior design, Pade participated in the geological institute in which he learned how to evaluate the diamonds, distinguish the stones, the cast and the soder. He was also where he learned the practice of jewelry rendering. "It's a lost art, really," he says. "It is very precise: work up to the millimeter on paper, so you really learn how guage sizes and shapes, how to set things up, which supports will work better. It is very traditional that teach you, but then you can take it in your direction." His own direction has finally conducted its ancient passion for organic materials. However, today, the designer favors teeth of prehistoric shark teeth and the coral of 140 million years over the seashells found. "The materials I am using really inspire the collection," he says. "Shark teeth come from the Pliocene era and Alaska's coral is from the Jurassic period. I love to use things that are truly unique and  $\hat{A}$   $\hat{e}$   $\hat{a}$   $\hat{r}$   $\hat{a}$  existed so long ago. We remind us of our mortality. "It is in pade pendant necklaces and other drawings that these ancient materials receive a new life. The tooth of a raw shark is accented with a thin wreath of gold and diamonds; a delicate piece of the rare coral of the designer crashes From a replacement gold chain. "I love juxtaposition of materials," he says. "I love the contradiction." He trampling further in his direction, the designer created his own special league, a mixture of rose gold and yellow gold, which It has produced a good gold of 18 carat fishing in fishing, medium medium $\hat{A}$  $\hat{f}$  $\hat{a}$  $\hat{e}$  $\hat{A}$ ,  $\hat{r}$ ,  $\hat{a}$   $\hat{r}$   $\hat{A}$   $\hat{r}$   $\hat{A}$   $\hat{e}$   $\hat{a}$ ,  $\hat{r}$   $\hat{A}$   $\hat{A}$   $\hat{e}$  to which to work. Using this custom metal, The designer has created one of his favorite designs (which he wears every day), the ring of the hummingly hand-carved by hand. "It's raw and sensual," says Pade. "Yet he still has a subtype of femininity". L 'ring of colibrins is part of the refined designer's jewelry collection. However, it also plans a line of pon You called Pade from Pade Vavra, which has a more playful approach and is defined seasonally. "The beautiful collection of jewelry is more coherent aesthetically," he says. "I don't want to manipulate things too much," says Pade. "I want a piece to look like the Earth." Pade Vavra is available at TG170, it can favor the materials that are more than 100 million years, but the designer based on Los Angeles Pade The Vavra approach to the creation of jewelry is far from the ancient history. history.
