In 2019, 41 rectified countries, including Azerbaijan, Russia, and even Australia, and around 180 million spectators looked at the television competition, although most Americans don't know much. Eurovision Song Competition: The history of the fire saga, protagonist Ferrell and Rachel Mcadams as an Icelandic singer duo without effort, should have opened theatrically at the end of May to coincide with the real event. But with Eurovision himself canceled, Eurovision the film should not only be alone (on Netflix); It could only stand up for the real thing, because the music is Ã ¢ â,¬ "ridiculous and captivating in equal measure - it is probably as good as much of what Eurovision has anyway. Ã ¢ â,¬" did not want a Fuck in a box, but not we will not do a star here, "he says Director David Dobkin, who, also having direct wedding shams, is also a veteran video video. He imagined the songs of the movie walking on the thin line between Satire and free. Ã ¢ â,¬ "ã okay if it's fun, but it must be a really good music. It must still be great and only kitschy enough to be Eurovision, because it's part of what is fun for Eurovision.ã, â,¬ (also, no one has fun having fun in Eurovision better than Eurovision.) For Ferrell, Those who say he was introduced for the first time at Eurovision over 20 years ago thanks to his Swedish wife, the film served as something of a love letter to the event. Ã ¢ â,¬ "My first experience looking Eurovision, I still sucked up earlier because Sweden took place to win that year. So I've always been impressed with it." To produce the soundtrack, the directors They enrolled Savan Kotecha, who wrote and produced pop strokes for Aryan Great sympathets, Katy Perry and Goulding. Ã ¢ â,¬ "canors from Songwriter in the great type of pop-musical world with Eurovisioni," says Kotecha. Ã ¢ â,¬ "But when you have to do it, you realize that it is actually a craft For SÃ ©. "Help help The process, Kotecha assembled other writers - some newcomers, some legends, almost all Scandinavian. For choreography, the directors hired Tabitha and Napoleon dÃ ¢ â,¬ â "¢ Umo, the veterans of so you think you can dance and Idol American. Here, the songs created for the Eurovision Song competition: the history of the fire saga and the stories of how they came together. (There are some spoilers for the movie.) Played by: Ferrell, Rachel Mcadamsactually sung by: Ferrell, Molly SandÃ © (aka My Marianne), Rachel McAdams The music video that introduces the fire saga in the movie, complete with FerrellÃ ¢ Â, ¬ s Lars stoming around a armor to wear a desolate volcanic land, it was turned to a real volcanic lava field near Keflavik. (Ã ¢ â,¬ "It's new to burst again, apparently," says dobkin.) Behind the music: Ã ¢ â,¬ Â "Remember that episode of friends in which Ross thinks of being a musician, And playing the keyboard, and it really bases super seriously? Ã, â,¬ asks kotecha, who says he gave that point of reference to Gustaf Holter and Christian Person, the Swedish and compositional Swedish duo that created Ã ¢ â,¬ Â "Volcano man. Â »He also suggested thinking of Ferrell Ã ¢ ¬ Â Sithing doing something like that" Huh eh Huh Huh Huh, Ã ¢ ¬ Ã ¢ ¬ ¬ ¬ ¬ ¬ ¬ ¬ ¬ "Start the song, Referring to Rhythmic Lars singing that opens the piece. Ã ¢ â,¬ "and 'have just arrived â €
