Milkman46, MineAsaur, MMG.1010, NIVRO1010, Official General 479, Prod.Snakeeyes, Qaus80, Rubenoliveira, SAFAP, Shakilmunshi add multi-protection visual spa with vehicle preview (TC). The new version adds additional features and options. Changes in version 3.3 - Page numbers and buttons with page change. Changes in version 3.2 - The selection of colors in the car settings has been significantly simplified with the introduction of a palette of 127 colors. - Added in machine settings, added "Color ID" which shows the current color ID of the square the cursor points to. - You can now select additional parts in front of the hot tub in the car settings. - As part of the machine, the ability to add immunity has increased: from bullets, fire, explosions, collisions, melee weapons. Changes from Version 3.1 - Lettering write lengths have been slightly shortened (now the Spa name will not touch the "Find..." buttons in the top right corner using the original English changes) Changes in version 3.0 - Version 3.0 - Now you can open a spinner sitting in the car. - Car will no longer get stuck on slopes. - You can now produce cars indoors. - Added search engine for cars by their standard names. - Added system for distributing cars by groups (categories). - added to add your license plate in car settings. - removed unnecessary renown machines feature in machine settings, now it shows current CXT key. - Added option to set machine color in machine settings. - After adding the machine, the specified model ID will be verified for the machine so that no foot pedals or objects are added to the hot tub. - Add Settings menu. - Added the ability to attach a manageable work train to the tracks. - Added remote control of RC vehicle. - Fixed error with incorrect display of total number of pages after changing group name to your name or your writing license There are currently 3,304 users and 37 participants: jadie, 2K Modding, Adri CJ, Ayayk, Azizz, Burnett, Chenlin, Douglink, Dukludde, Endochronic1, Film1661, Frassaff, Greeneid, Isaack567P00, Official Generation 479, Official, Qaus80, Rubenoliveira, Safap, Shakilmunshi, SMOA, Svychev, Thebenlesquendero, R. Tall, Tyotyory adds a multifunctional visual bath with a vehicle. The new version adds more features and options. Changes in version 3.3 - OK buttons focus on switching between page numbers and pages. Changes in version 3.2 - The choice of a color in the car settings has become much easier thanks to the palette introduced in 127 colors. - Adding "color identity" labels to the parameters of the device, which indicate the current color identity of the square with the focus cursor. - You can now select additional parts before the SPA. - Addition of the possibility of adding immunity to the parameters of the machine: balls, fire, explosion, collisions, melee weapons. Changes in version 3.1 - The registration font has been slightly reduced everywhere (now the name of the spa does not touch it "find..." in the upper right corner using the original English). He is sitting in the car. - The machine will no longer go to inclined plans. - You can now create a car inside. - Addition of a standard car search system. - Addition of a group (category) and car distribution system. - Addition of the possibility of placing a table in the vehicle settings. - The configuration of the machine has now deleted the rendering function unnecessary from the machine which displays the current CXT key. - Addition of the device's color option parameter to the device settings. - When connecting a machine, the identity of the specified model will be verified to determine the presence of the machine, so that the SPA is not connected to a pedal or an object. - Add a settings menu. - Possibility of placing a controlled work train on rails. - Add the possibility of controlling RC transport remotely. - After changing the group name for yourself or to write the corrected license with the bad number of all pages. In machine settings and returned. More information and how to use this spawn in the manual, which can be downloaded separately at this link: This manual has the following sections: - How can I change it? Is this a photo of a normal car? - How to add image to new custom machine? - How to add your picture to a group? - How can I change the original name of the car to myself? - How to add a car to a group? - How can I change the color of my car to my own color? - How can I sleep on a moving train? - Options menu in Visual Car spawn v3.0 - Known bug in Visual Car Nephew v3.0, it is not recommended to use cracks and other elaborate ones, on which English letters are replaced by Russian ones. Spawner has only English localization, and owners of a similar Russian language may have problems with displaying incorrect letters in the inscriptions of the game itself when using this Spawner. Cleo v4.3 requires a library to recommend for download: ASA Plugin - download in pelesofix or SilentPatch: Accept the contents of the archive by accepting the game and assign the game to the game folder. Key activation: default H + 7 (regardless of whether the player controls the equipment). You can also change two keys in the vcs.ini file in the parameters of the vcs.ini file: the startTexture - the image of the start symbol startKey1 - the first identification number of the switch to start ovulation (id - 72) h key) startKey2 - the second identification number The switch that allows ovulation by default (ID - 72), ID - 55, key 7) Show images - images spa images (use txt file): 1 - open, /0 - closed. Playncar - the direction of the player to the car that the driver sees: 1 - open, /0 - closed. Offsets - take the distance from the appearance of the player as a counter (you can enter a negative value) - the angle of the car in degrees (enter from 0 to 360) RC MODE - the ability to control a remote controlled vehicle: 1 - OPEN, /0 - closed. Spawnerrailways - option to create a train that runs on the nearest tracks: 1 - open, /0 - closed. We store the car in the memory when leaving the SPA: 1 - open, /0 - closed. DELTAIME - cursor movement, frames per second in game: 1 - open, /0 - closed. Sensitivity - mutual sensitivity of the cursor movement (the smaller the value, the faster the cursor moves) Openincar - activation of the player's spa when checking the playerTransport: 1 - a, /0 - deactivated. Thanks: Greek for the position of the English spa. Dk22pac to prevent a well-known error. Demonstration script (version 3.0): demonstration of the script (version 3.2):
