Through a combination of a solid hardware in terms of performance as well as quality build an honor 7 finds its way to the fast growing category of very-good-e-extremely accessible android phones . At a functional level, it does almost all very well, and packages that functionality in the type of impressive metal chassis we have been waiting for Huawei. But just as Huawei is a force of honor, it is also a weakness. For some buyers, especially Android purists, highly personalized emui software from the company will be the highest reasons not to buy. Construction Quality Sólida and Easy Scanner One-Handed Scanner Using Digital Printing Works Well Speedy, A Brilliant Lag Performance, Grease Display and Excellent Lecturer Excellent value for software emui Huawei Money is scary © Never Many Software Problems of the Left P8 Hit Camera Without Solution and Lose Down Light View: 5.2 Inch Full HD LCD Screen LCD Resolution 1920x1080 (435ppi) Camera: 20.7 MP, iv † /2.0 5MP Lens Battery Front Cans: 3100mAh Pick Charging Capacity: Octa-Core Huawei Kirin Processor 935 4x2.2GHz A53E Nums + 4x1.5GHz A53 N° 3GB RAM 16 GB Slot MicroSD Internal storage (also second SLOT yes) We are posting this comment after a week using a European-Spec Honor 7 (PLK-L01) in the UK. Most of the time we use our comment device on Vodafone UK, in areas with decent LTE and HSPA cover and a 64GB Samsung MicroSD card equipped. To test the Dual-SIM capabilities of the phone, we use with a yes and next to Vodafone yes. Honor 7 Veheo step by step if you know that your Huawei phones, the appearance of honor 7 is very easy to summarize. It is basically a cross between the companion 7 Huawei "phablet" a device last year and current high-end offer of the company, the P8. Although honor is its own distinct brand in the UK, the design traces of Huawei are clear to see. There is a pretty much untouched front side, except for the usual headset, cámal and sensors, while the back panel serves as a ripple reminder of Huawei's cutting-edge telephones with a curved aluminum surface and attractive chamfers. Veterans of Series Honor will find a device closer to Honor 6 than the largest (and more robust) 6 Plus. The LCD receives a modest collision to 5.2 inches with the same 1080p resolution, while modest Honor 6 hardware upgrades can be found in other areas. HOMEGRown 64-bit Kirin 935 CPU The Honor 7 Huawei races, an octa-core chip packaging four "A53E" greater clock of up to 2.2 GHz and four low-consumption A53 1.5GHz nés. If you are keeping bookmarking here, it is basically the same as Kirin 930 feeding Huawei P8, just at larger clock speeds. And is paired with an ARM Mali-T824 GPU and a 3GB of RAM. Other places, the stadies capacity of the battery in a wide 3.100mAh, while the front and rear cáms gain upgrades to 8 and 20 megapixels, respectively. (Frontal camera also grown a LED flash for low light Duckfacing.) There is an even more significant acronym around the back. Honor 7 has a touch-activated digital display sensor with some tricks to offer. As well as the biomit security safety à €™ need to unlock first, like that, how to touch the sensor will activate it, even when the phone is turned off es € you can slide down to open the tab Notifications, or to view recent applications. The notification shortcut, in particular, is ridiculously à € átil even in a relatively small telephone like honor 7, reaching the notification flap can be problematic, and the shortcut theft replaces this Strange finger-gym with an easy gesture. We really hope all who work on a phone Scan digital impressions steals this feature. And like almost everything in Huawei emui, these extra functions are configurable à € à €
