Sony rx100 iv price in pakistan.

The RX100 IV is cited in a rather little more than 280 shots compared to the Mark III (although not much better) 320. This can be recorded in two or four seconds cracked, which doesn't sound much, but when these are played back in super slow-motion it translates into much longer clips - a two-second burst played in 1000fps becomes 80 seconds video. When it comes to regular shooting, many of the very impressive features of the RX100 III are maintained, including the five-axis image stabilization to help keep images smooth. Presumably this is a result of the most powerful sensor, but it's something to think about if you'll be using it as your travel camera. The 10 best compact cameras you
