Banal nationalism is often created through state institutions such as schools [5]. It can contribute to the construction processes of the country from the bottom to the high. [6] The main purpose of Michael Billig in coining the term was to clearly distinguish daily endemic nationalism from extremist variants. 2017, London: Palgrave Macmillan, p. Banal nationalism. Banal nationalism refers to the daily representations of the nation that build a shared sense of national belonging between humans, a sense of tribalism through national identity. The striped price of Italian books corresponds to the cover price. Many of these symbols are more effective due to their constant repetition and almost subliminal nature. Billig's book has been described as "the fourth most quoted work on nationalism ever published" [1] Billig conceived the concept of "trivial nationalism" for the usual and often unnoticed ways in which the consolidated nation states are reproduced day by day. day. Note: Expected availability refers to individual availability. The concept has been very influential, particularly within the discipline of political geography, with a constant academic interest since the publication of the book in 1995.[2] Today, the term is used primarily in the academic debate on identity formation, geopolitics, and the nature of nationalism in contemporary political culture.[3] Examples of trivial nationalism include the use of flags in everyday contexts, sporting events, national songs, money symbols,[4] popular expressions and twisted words, patriotic clubs, the use of the implied union in the national press, e.g. the use of terms such as the Prime Minister, the weather, our team, and the subdivision into "domestic" and "international" and "international". ^ a b Koch, Nathalie; Anssi Paasi (September 2016).
