(Definition of knocking from the Cambridge Business English Dictionary © Cambridge University Press) La dea Maya "Itzel" redirects here. For other uses, see Itzel (disambiguation).
Ixchel in the Codex Ixchel of Dresden or Ix Chel (Mayan: [iːtʃel]) is the name of the 16th century of the aged jaguar goddess of the midwife and medicine in the ancient Mayan culture. She corresponds, more or less, to Toci Yoalictl "Our grandmother the Night Doctor", a goddess of the Aztec land that inhabits the sweat, and is linked to another Aztec goddess invoked at birth, viz. Cihuacoatl (or Ilamatēcuhlli). [1] In the new classification Schellhas-Zimmermann of Taube of the merluche deities, Ixchel corresponds to the Goddess O. Identification Referring to the beginning of the sixteenth century, Landa calls Ixchel "the goddess of making children". [2] It also mentions it as a goddess of medicine, as shown by the following. In Zip, the Itcil Ixchel festival was celebrated by doctors and shamans (hechiceros), and stones of divination, as well as fasci of medicine containing small idols of "the goddess of medicine that called Ixchel" were carried forward. [3] In the ritual of the Bacabs, Ixchel is once called "grandmother". [4] In their combination, the two main domains of the goddess (birth and healing) suggest an analogy with the aged Aztec goddess of obstetrics, Toci Yoalictl. Ixchel was already known with the Maya Classica. As Taube has shown,[5] corresponds to the goddess O of the Codex of Dresden, a woman aged with jaguar ears. A crucial piece of evidence in his argument is the so-called "Birth Vase" (Kerr 5113), a classic Maya container that shows a birth presided over by various old women, led by an old jaguar goddess, the O ending goddess, all have weaving tools in their headdress. On another Maya Classic pot (Kerr 6020), the goddess O is shown as a doctor, further confirming her identity as Ixchel. The combination of Ixchel with different age obstetrics on the Birth Vase recalls the Tz'utujil assembly of the ostatic goddesses called "feminine gentlemen", the most powerful of which is described as particularly fearsome. [6] Meaning of the name Glyph name of Ix Chel including the prefix 'red', Dresden Codex. The name Ixchel was in use in the 16th century Yucatán and between the Poqom in the Baja Verapaz. [7] Its meaning is not certain. Supposing the name originated in Yucatán, which may mean "rainbow". His glyphic names in the codes (Post-Classico) have two basic forms, one a prefix with the primary meaning of "red" (chak) followed by a glyphic portrait ("pictogram"), the other logosyllabic. The classic name of Ix Chel remains to be identified. It is quite possible that several names were in use to refer to the goddess, and these did not necessarily include her name Yucatec and Poqom late. Its code name is now generally rendered as "Chak Chel". Confusion with the goddess of the moon In the past, it was common to take Ix Chel as the name Yucatec of the goddess of the moon due to an association shared with human fertility and procreation. [8] The identification is questionable, however, since (1) colonial and ethnographic sources do not provide any direct evidence to show that Ixchel was a goddess of the moon[9] and (2) the goddess of the classic Maya moon, identifiable through its crescent, is invariably represented as a young fertile woman. Moreover, fertility and procreation are important for an aged midwife as for a young mother, although in different ways. Ixchel as a land and a war goddess An entwined snake serves as a headdress of Ixchel, crossed bones can adorn his skirt, and instead of human hands and feet, sometimes has claws. Very similar features are found with goddesses of the Aztec land, of which Tlaltecuhlli, Toci and Cihuacoatl were invoked by the obstetrics. Being a goddess jaguar,Classic (or 'Chak Chel') could be equally imagined as a fearsome female warrior with shield and spear.[10] not unlikein Yaocuihuatl's capacity ("Warrior Woman"). [11] Ixchel as a goddess of rain The Codex of Madrid (30b) assimilates the goddess or a god of rain, with the rain that gathers from her bracelets and abdomen, while the codex of Dresden includes her to Almanacs dedicated to the gods of rain (Chaacs) and generally has her to reverse a jar of water. On page 74 of the same codex, its emptying of the water jar replicates water vomiting from a celestial dragon. Although this scene has usually been understood as the flood that brings the end of the world, [12] is now thought to symbolize periodic rain storms and floods as expected on the basis of the previous tables if «table». [13] Mythology Ixchel figures in a myth Verapaz related by Las Casas, according to which she, along with her spouse, Itzamna, had thirteen children, two of whom created paradise and earth and all that belongs to it. [14] No other myth that calculates Ixchel has been preserved. However, his mythology can once focus on the Sweat suit, the place where Maya mothers had to go before and after birth. [15] As stated above, the Aztec counterpart at Ixchel as the patron of obstetricia, TocÁ, was also the goddess of Sweatbath. In the myths from Oaxaca, the mother adopted of the brothers of the sun and the brothers of the moon is finally imprisoned in a suitbath to become her patron deity. [16] Several myths of Maya have aged goddesses end in the same place, in particular the cakehiquil and the Tzétujil grandmother of sun and moon, called Bë 1'4at2bë1'4al ("the implementation of weaving") in Tzë1'4utujil. [17] On the other hand, in Qébeqoché1'4 the sun and the myth of the moon, a goddess of aged Maya (Xkitza) who otherwise would seem to correspond closely to the adoptive mother of Oaxacan, does not seem to be connected to the Sweatbath. [18] Cult of Ixchel At the beginning of the 16th century, the women of Maya who seek to guarantee a fruitful marriage would travel to the Ix Chel Shrine on the island of Cozumel, the most important place of pilgrimage after Chichen Itza, off the eastern coast of the Yucatán peninsula. There, a priest hidden in a large statue would give oracles. [19] North of Cozumel is a much smaller island baptized by its Spanish discoverer, HernÁndez de Córdoba, the "Isla Mujeres" (Isla Mujeres), "because of the idols that represent the goddesses of the country he found there, like Ixchel, Ix Chelol Yax, Ixhuani, Ixhuania. They were dressed from life down and had their breasts covered, as well as the custom of Indian women. "[20] On the other side of the peninsula, the chief town Chontal Province of Acalan (Itzamkanac) venerated Ixchel as its main deity. One of the coastal settlements of Acalan was called Tixchel "in the place of Ixchel". The Spanish conqueror, HernÁn Cortá © S, tells us about another place in Acalan, where young unmarried women were sacrificed to a goddess in which "they had a lot of faith and hope", perhaps again Ix Chel.
