Después elige la unidad a la que quieres convertir el dato y pulsa sobre Calcular. Así de fácil Tabla de conversión de km / h a mph Los kilómetros hora se corresponden con una medida de velocidad usada frecuentemente en el sistema métrico de transporte. Los carteles de los límites de velocidad de las carreteras están expresados en kilómetros por hora que se representa como Km/h o Km/ h. Por otro lado, las millas por hora son una medida de velocidad extendida en Reino Unido o Estados Unidos, que no se adaptan al sistema métrico de transporte. Esta medida de velocidad se puede ver expresada como mph o mi/ h. Entre nuestros conversores puedes usar el conversor de Km / h a mph, y además puedes conocer la tabla de equivalencias para pasar de kmh a mph y viceversa, a continuación hemos recopilado los valores más comunes, para hacer la conversión de valores más específicos te recomendamos que uses nuestra herramienta. SiNo It offers the perfect alternative to the understated elegance of the Taycan, with which it shares its platform, by opting for a much more in-your-face visual attitude. However, it keeps it just civil enough to not have it contrasting with its typically luxurious Audi interior. The sleek-looking electric sedan will make its debut on the North American market this summer, and Audi has just announced that all e-tron GTs will be offered with three years of complimentary charging with the Electrify America network. That's not exactly the same as Tesla's lifetime Supercharger access that early customers got, but it should still provide a hefty incentive for what is already a very attractive package. The e-tron GT comes in two flavors: vanilla and RS. The plain version gets a total system output of 469 hp and 464 lb-ft (629 Nm) with an overboost function that cranks it up to 522 hp and 472 lb-ft (640 Nm) for up to 2.5 seconds. That's enough to give it a more than decent 0-60 mph (0-97 km/h) acceleration of 3.9 seconds, with the top speed standing at 152 mph (245 kph). The standard GT's maximum range (as estimated according to EPA procedures) is 236 miles (383 km), but if it's anything like the Taycan, independent tests have shown it'll have no problem going over the 300 miles (483 km) milestone. The model everyone will want, though, is the Audi RS e-tron GT. This one gets a base power output of 590 hp and 612 lb-ft (830 Nm), with the overboost taking the former to 637 hp. Consequently, the benchmark acceleration run is dispatched in just 3.1 seconds, and the top speed also gets a slight bump to 155 mph (250 km/h). If cold numbers don't quite cut it for you, here is a quick video of an Audi e-tron GT hitting the advertised top speed on the German Autobahn, though the dense traffic meant that the driver had to be patient and choose his moment carefully. With that in mind, you'll need to skip to the 15:00 mark for the full 155 mph (250 km/h) run, but feel free to watch the rest of the clip as well for a more complete experience. It combines the practicality of an executive sedan with all the bells and whistles expected from such a model, supercar-like performance and instant thrust. Sitting at the top of the Taycan range, the Turbo S has up to 750 HP and 774 pound-feet (1,050 Nm) of torque with the Overboost function enabled, or 616 HP without it. See More: Tesla Model S Performance Can't Keep Up With Porsche's Taycan Turbo S In the sportiest driving mode, it needs only 2.8 seconds for the 0 to 62 mph (0-100 km/h) sprint, and will hit the 60 mph (96 km/h) mark in just 2.6 seconds after setting off, while flat out, it will do 161 mph (260 km/h). Now, as we all know, certain sections of the German Autobahn do not have a speed limit, and that is where this Taycan Turbo S demonstrated its 0 to 155 mph (0-250 km/h) acceleration in a continuous sprint. Mind you, the entire video is only 16 seconds long, and it actually took a bit less for the electric sports sedan to complete it. In case you want a Taycan Turbo S, then get ready to pay a minimum of €186,336 (\$226,514) in Germany, and at least \$185,000 in the United States, where it has an EPA estimated driving range of 201 miles (323 km), millas por hora a kilómetros por hora (Intercambiar unidades) Formato DecimalFracciones Precisión Selección solución 1 cifra significativa 2 cifras significativas 3 cifras significativas 4 cifras significativas 5 cifras significativas 6 cifras significativas 7 cifras significativas 8 cifras significativas Nota: los resultados fraccionarios se redondean al máximo posible al 1/64.
