To Download the Project files and the post-production course, please check the link below: really hope you've enjoyed this course , like and share it . :0)Blog: YouTube Channel: This tutorial covers some basic lighting setups for replicating automotive studio-style shots. The key to successful automotive rendering is with realistic 'real world' lighting. A lot of work and 'fine-tuning' goes into lighting an automobile correctly in a studio. Achieving the right lighting is key to creating interesting specular reflections that will help accentuate the aesthetics of the automobile. The tips provided here aim to make this process easier. The scenes are simply lit with a quad light representing large studio softbox lighting. A reflector may also be added to show reflections in the side of the car body Lighting Rig ScenesOnce you have downloaded the zip file (link above), you will see that it consists of three lighting rig scenes. They contain the body of a car to use as a reference for positioning your car model, render camera, and floor plane/cyclorama. Lighting rig scene with car body as a position reference Importing the CAD DataDownload the CAD model (link above) Extract the contents and import this step file: AUDI ASSEMBLY.SLDPRT (SolidWorks Part File) into one of the lighting rig scenes.Position and rotate the car so that it sits flat on the grid (in the same place as the reference car body geometry). Trabaje sin problemas con otro software. V-Ray es compatible con todos los plugins de 3ds Max más populares: Substance, Forest Pack, Railclone, Ornatix, Tyflow, Phoenix FD y más. V-Ray también es el ajuste perfecto para cualquier pipeline con soporte para estándares abiertos como Alembic, OSL, OpenColorIO y ahora ACEScg Page 2Sincronización inteligente Chaos Cloud carga automáticamente lo que necesita para renderizar. Y cada vez que se actualiza una escena, solo vuelve a sincronizar los datos modificados, manteniendo los tiempos de carga al mínimo absoluto. Vista en vivo Mire como va un render desde cualquier lugar en cualquier dispositivo. Tan pronto como se envía un trabajo, los usuarios pueden monitorear su progreso desde una computadora, tablet o incluso desde un smartphone.
