Aplikasi video compressor terbaik android. Download aplikasi video compress android. Aplikasi video compressor android. Aplikasi kompres file pdf android. Compress video di android tanpa aplikasi. Aplikasi kompres mp3 android. Aplikasi kompres video android. Aplikasi kompres audio android.

Photo compress applications now people do not need a sophisticated camera to get good images or photos. Because the smartphone is now equipped with a high resolution camera. The photo format becomes bigger, because it has more dense details. With a variety of reasons, sometimes someone wants to reduce the size. As we know that it stores too much file with a large size, which will make our smartphone memory fuller. In modern times, as today, everything becomes easy. One of them minimizes the size of the photo using the photo pack app. For those of you who are curious to know what you look at our review this moment. Using the best compressed image application you will certainly make it easier for you for the compression of the photo size both in PNG, JPG format and so on until the necessary dimension. And certainly, even if the compressants will not reduce its original quality. Even the same clear, transparent and the image still seems sharp. There is no need to linger more, below are some of the best photo compress applications I recommend, including: 1. Photo Compress & Resize the first application called photo compress & resize, in which this application is developed by LIT Photo. This application has the ability that can compress the size of the 200 kB image, very small is not? Furthermore, this application is also equipped with a culture function that is useful for cutting photos that are not desirable from us. The use of this function is also easy, just browsing with your finger. Not only that, there are additional features that are no less important, ie tablet lot. Where this function is useful for photo compression at the same time in large numbers. The result will be automatically saved in different folders, so that it does not mix with the original photo folder. So it is easier to find which photos were compressed or not. 2. Photo Compress 2.0 The second application called Photo Compress 2.0. Where this application is able to reduce the size of the photo to your Android phone in a simple way and without any advertising interruption that loves to appear suddenly. Although the size is small, it does not mean that the results of the tablet are ugly but good as other applications. Because the size is small, so it can be used for all types of mobile phones, even if the Android phones like HP potatoes that have very low specifications. This application can be used as well as a tablet, but it can also resize and crop the photos with ease. The Photo Compress 2.0 application is also equipped with advanced features, redimension batch, Where the function can be able to compression in large quantities. It is only that for the free version it can only be 10 photos that can be compressed. If you want the numbers more to switch to the prize or paid version. The best photo application next pack that I recommend is the pic in batch tool. Where this application has a small size of about 5 MB with a simple display an interface to easily understand and used. Although the size is small and you can be installed all the devices, it is not good less with similar application. Where this application offers a favorable function that is guaranteed to produce a satisfactory photo pack. Even when running out of the Internet, it's still using the offline application so that the photo format compression process still works and the results are also good as in line. Despite the compression, the quality of the original photo does not change, remains the same. Only the size is smaller. READ ALSO: Remini Mod APK 4. Qreduce Lite Qreduce Lite is the fourth application I recommend for Of You who want to compress photos. The application presented by MOBSI application is able to reduce the size of the photo simultaneously. With this application, you can also possible Photographic quality is of a compliance with the volunte of the size of the image size. Also this application can compress in a much smaller dimension than you think. After completing the compression process after, the photo will be automatically saved in your mobile gallery. In any case, about the quality of quality it does not need to be questioned. Are you interested in trying to use this app? 5. Small photo The next application that you can use to reduce the image size is very small photo. Where this application is intended for Android smartphone users. This application has a very reliable capacity to compress photos in large quantities. Even with this application, you can also do it with PNG or JPG formed simultaneously. The Piccolo Photo application also offers a wide range of interesting features that you can use how to resize, cut out, converting format, and others. This application has a size of about 4.6 MB which is very small and therefore is light and can be connected to any smartphone, even a potato phone. READ ALSO: Photo Editing Cartoon Application 6. Compress Riot Application The next photo comes from the Radical Image optimization software or known to the people called Riot. This application can reduce the size of the smallest image without having to reduce its original quality. So it's great for you as the photos editing. One of the advantages of Riot, which is no property the application of other compressings Image is the presence of real-time modification functions. Where you can compare the original photos with the results that have been compressed. It's just that to use this application you need to use a portable device or a computer. And the devices used at least have been supported by 2 GB of RAM, with Intel Pentium 4 or AMD Athlon 64 @ 1.4 GHz. For OS SÁ @ can be from Windows 7/8/10. 7. Jpegmini Jpegmini is a software for computer or laptop devices that serve to compress photos with facilities. With this application you can reduce the size of the image up to 80% without having to reduce the original quality to all. Maybe many wonder, why can it be? Of course it can, because this application is equipped with the most modern algorithm. Until the quality of the original image is high resolution there will be no effect if tablet. This application also provides a trial version that you can use for free and can compress photos in large quantities of about 200 photos. To use this application of a minimum RAM of a 2 GB device with an Intel Pentium 4 or AMD ATHLON 64 @ 1.4 GHz processor. 8. Photo & Photo Picture Resizer & Picture Resizer is one of the package photo packs intended for users of Android devices and can be invoked for those of you who like to edit photos. This application is very easy to use, so people who are still unfamiliar do not have to be confused how to do. This application provides a number of interesting features that you can use. One of them is a lottery resizer and has image capabilities without reducing the quality of the original image, so there is no need to be afraid that the results was compressed will be bad or it is not clear. One of the other advantages of this application is that there is no need to worry if the original image file is compressed, the item this application will do two different files, the version has not been compressed and has been compressed. READ ALSO: How to combine the final photo of how, don't you need to be once again not to confuse to compress photos? You can use one of the best applications of the tablet if it is for portable or mobile devices. Please choose which way is the best and the features are complete. For now, you can say that video content is an important part of everyone's life. However, unfortunately the presence of bandwidth and cut limits on each social media, sometimes they do the desired video shipments cannot be done. Therefore, therefore, You need to reduce or compress the size of the video before it is loaded. So how? That is to say using the compressed video application. So, with this application, the video size can be reduced so that it does not exceed bandwidth and the specified size limit. The best video package application for iOS, Android and PC, for now, there are many video compress applications that can be found on the internet. But not all applications are able to offer the comfort of maximum use and results. Well, here are some applications to compress the recommended video. 1. video compress & resize video compress video & video resize is a free video compressing available available for free. The main advantage of this application, while maintaining the original quality of the video, even if its size is reduced to more than 80%. This application is designed for iOS devices and its use is also very easy. You just need to open the application, choose a video, then immediately pack. After that, the compression video will be entered directly into a special folder. 2. Compressor Video & Video Editor Compressor & Editor is a video compressing application for iOS developed by Yong Chen. In Apps Store, this application has a rating 4.6. In addition to being easy to use for the simple display interface, video compression results also have enough quality. First the video through the compression phase, it is also possible to cut, separate, merge, to rotate the video according to desires. Some additional features are available in this application such as support for different bit speed options, the preview function, and so on. 3. Video Compress Á ç à,~ "Shrink Vids Video Compress - Shrink Vids is a video compression application for iOS users. This application developed by Martin Brachmann gets a score of 4.5 in the App Store. So there is no one. ~ need more hesitate, with quality. The force of the tablet that is presented can be adjusted to the selection of bits and dossier resolutions. Furthermore, the preview function is also very useful for checking video results after the compression process. It's complete. Simple interface display, it also makes anyone with ease using this application. 4. Most thin video more than a simple video of compression application for the iOS platform, the more subtle video also allows you to rotate, cut, add video. The sophistication of the application does not need to be questioned more, because the video compression process is carried out in a short period of time. This applies Cation also allows video compression up to 80%. When the compression process is complete, it is also possible to immediately share the video in different social media. In addition, there are also features that offer the possibility to remove the original video after compressed video. 5. Smart video compressor smart video compressor developed by Appaspect Technologies PVT Ltd. and have a rating 4.6 on the Google Play Store. With this application, you can compress the desired video easily and quickly. Also, this application is also free or not paid at all. When you compress videos with HD quality, the video file size can be reduced from 70% to 80%. After the compression process is complete, you can immediately check the product video. If it is not yet suitable, you can immediately repeat it. 6. Dieter Video 2 If you are looking for an Android video compression application that offers many features, you can try this one application, yes, besides being used for video compress, Dieter 2 videos can also be used for modify Video games, and support 4K video format compression. This application also provides options for video compression results, ie with high quality, medium and low. For the free version it can be used for simple video compression, though though You want more functionality, you can buy within the application. 7. Video Transcoder maybe most free compress video applications on Android will always display ads when the video compression process is complete. But it's different from this application, you will not find ads during their use. Videos Transcodipers are in fact more focused on providing better experiences for video compression users. With this application, you can edit fps, codecs, bits, resolutions, for audio. 8. VidCompact VidCompact is a video compressor created with the video editing application that has been downloaded, as much as 100 million times on the Google Play Store. In addition to being used to compress the video format, this application can also be used for video cutting, renaming, and so on. Take it Easy, because the application is not paid or free. Perhaps some ads are displayed when you use it. But it is guaranteed that the number of announcements is not too much, do not interfere with the current video compression process. 9. Video Compress Á ç à,~ "Reduce dimensions and extract audio based on your name, in addition to being used to compress the size of the video, the application called video compress Á ç à,~ "Reduce dimensions and extract the audio can also be used to extract the audio from the desired video. Application designed for this Android device is considered able to reduce video size up to 80%, without significant decrease in quality. With its interface display that seems simple, making new users can easily use this application. 10. Format Factory One of the video package applications on the most recommended PC is Format Factory. This Open Source application is designed with a simple display interface. So it can be used easily by anyone, even beginners. This application provides many menus that can be chosen. Some of them are like screen size settings, fps, resolutions and various other settings. Interesting features of this application, ie the possibility of sending video classes directly to mobile devices. 11. Any video converter for those of you who use a laptop or a PC, then you can try an application called Any Video Converter to reduce the video size. The use of this application is also very easy. You just need Á ç à,~ "Drag and Drop" video in the application, set the parameter, then immediately compress the video. This application also has the support for compression of various types of video formats. Interesting features of this Video converter, which allows users to download videos from YouTube and also Netflix. Some of the above applications are most of the recommended video compress applications. Perhaps if you find another similar application, it doesn't hurt to use it. But applications above their abilities and quality are guaranteed. See also: 12 best photo scan applications for Samsung Android Samsung Font Collection
