# JOHN GOUDIE'S 5 SIMPLE TIPS FOR ELECTRICAL SAFETY

Most electrical fires and electrical injuries can be avoided. Follow these 5 tips to begin electrical safety in your home.

**1 AVOID OVERLOADING OUTLETS**  
Plug only one high-wattage appliance into each receptacle.

**2 FOLLOW WATTAGE RECOMMENDATIONS**  
Only use bulbs that match a lamp's recommended wattage.

**3 TURN OFF THE POWER**  
Always turn off appliances and devices when you leave the room. Many electrical fires are started by overheating outlets or wires.

**4 KEEP AWAY FROM WATER**  
Electrocution is a risk when an electrical device gets wet. Keep all electrical devices away from water.

**5 CALL AN ELECTRICIAN**  
For any electrical work you do around the house, if any electrical outlet feels hot, you hear crackling noises, or you notice frayed or split wiring.

### PLAY IT SAFE.
