The Radical Republicans were a vocal and powerful faction in the U.S. Congress which advocated for the emancipation of enslaved people before and during the Civil War, and insisted on harsh penalties for the South following the war, during the period of Reconstruction. Two prominent leaders of the Radical Republicans were Thaddeus Stevens, a congressman from Pennsylvania, and Charles Sumner, a senator from Massachusetts. The agenda of the Radical Republicans during the Civil War included opposition to Abraham Lincoln's plans for the post-war South. Thinking Lincoln's ideas were far too lenient, the Radical Republicans backed the Wade-Davis Bill, which advocated more stringent rules for admitting states back into the Union. After the Civil War, and Lincoln's assassination, the Radical Republicans were outraged by the policies of President Andrew Johnson. Opposition to Johnson included overriding presidential vetoes of legislation and eventually organizing his impeachment. The leadership of the Radical Republicans tended to be drawn from the North American 19th-century Black activist movement. Thaddeus Stevens, the leader of the group in the House of Representatives, had been an opponent of enslavement for decades. As a lawyer in Pennsylvania, he had defended freedom seekers. In the U.S. Congress, he became head of the very powerful House Ways and Means Committee and was able to exert influence on the conduct of the Civil War. Stevens prodded President Abraham Lincoln to emancipate enslaved people. And he also advocated the concept that the states which had seceded would be, at the end of the war, conquered provinces, not entitled to re-enter the Union until they met certain conditions. The conditions would include giving equal rights to formerly enslaved people and proving loyalty to the Union. The leader of the Radical Republicans in the Senate, Charles Sumner of Massachusetts, had also been an advocate against the system of enslavement. In fact, he had been the victim of a vicious attack in the U.S. Capitol in 1856 when he had beaten with a cane by Congressman Preston Brooks of South Carolina. In late 1863 President Lincoln issued a plan to "reconstruct" the South after the anticipated end of the Civil War. Under Lincoln's plan, if 10 percent of the people in a state took an oath of loyalty to the Union, the state could set up a new state government that would be recognized by the federal government. The Radical Republicans in Congress were outraged by what they considered an overly mild and forgiving attitude toward the states which were, at that time, waging war against the United States. They introduced their own bill, the Wade-Davis Bill, named for two members of Congress. The bill would require that a majority of White citizens of a state which had seceded would have to swear loyalty to the United States before a state would be readmitted to the Union. After Congress passed the Wade-Davis Bill, President Lincoln, in the summer of 1864, refused to sign it, thereby letting it die by pocket veto. Some of the Congressional Republicans responded by attacking Lincoln, even arguing that another Republican run against him in that year's presidential election. By doing so, the Radical Republicans came off as extremists and alienated many northerners. Following the assassination of Lincoln, the Radical Republicans discovered that the new president, Andrew Johnson, was even more forgiving toward the South. As might be expected, Stevens, Sumner, and the other influential Republicans in Congress were openly hostile to Johnson. Johnson's policies proved to be unpopular with the public, which led to gains in Congress for the Republicans in 1866. And the Radical Republicans found themselves in the position of being able to override any vetoes by Johnson. The battles between Johnson and the Republicans in Congress escalated over various pieces of legislation. In 1867 the Radical Republicans succeeded in passing the Reconstruction Act (which was updated with subsequent Reconstruction Acts) and the Fourteenth Amendment. President Johnson was eventually impeached by the House of Representatives but was not convicted and removed from office after a trial by the U.S. Senate. Thaddeus Stevens died on August 11, 1868. After lying in the state in the rotunda of the U.S. Capitol, he was buried in a cemetery in Pennsylvania he had chosen as it allowed burials of both White and Black people. The faction of Congress he had led continued, though without his fiery temperament much of the fury of the Radical Republicans subsided. Plus, they tended to support the presidency of Ulysses S. Grant, who took office in March 1869. Donald Trump loves to hate on the US-China trade deficit. Ironically, these days that deficit proving to be a source of tactical strength. As the White House trade war with China intensifies, the huge amount of goods that Americans import from China has become the means by which Trump can keep upping the ante, threatening ever-increasing amounts of tariffs. China, by contrast, is running out of US goods to slap duties on. The Trump administration is now threatening \$200 billion in additional tariffs on Chinese goods. China can't match that, since it imports way less. (In 2017, it only imported around \$150 billion of American goods, but the Chinese government doesn't need tariffs to punish American companies. After all, it wields the power of the world's biggest propaganda machine. As the eye-opening chart below shows, the recent past offers a couple prime examples how swift and effective the Chinese government's attacks on foreign companies can be, as Mark Williams, economist at Capital Economics, explained in a note Tuesday (June 19). In 2012, for instance, when the spat between Japan and China over the Senkaku/Diaoyu islands heated up, the Chinese government's anti-Japanese propaganda caused sales of Japanese cars to plunge around 50% in a single month. The same thing happened to Korean companies last year, thanks to a dispute with China over the installation of a US anti-missile system in South Korea (its acronym, mentioned in the chart below, is THAAD). During that dispute, a Chinese consumer boycott also dealt a brutal blow to Korean makeup companies, as well as to its tourism sector and K-pop juggernaut. One benefit to the tactic of using propaganda to punish other countries is that it gives the Chinese government plausible deniability. Officials can "remain at arm's length from the resulting disruption to sales," says Williams. Most of the Japanese and Korean products that took a hit during those disputes were actually produced in China, which meant that the punishment could have been somewhat self-defeating. But switching to buying Chinese—instead of American—brands would be unlikely to hurt China's economy in aggregate. Plus, says Williams, "in the event of a further escalation of the trade dispute, China's officials would likely be willing to put up with some pain rather than give in." No new notifications You'll get updated when important things are happening, and when you engage with our community. Love it or hate it, nostalgia is the most powerful force in Hollywood these days, and that means a seemingly endless tide of reboots and remakes. So it's not surprising studio executives would call upon one of the most popular franchises of the '90s, the Mighty Morphin Power Rangers. In truth, the Power Rangers never really left us. A number of new series, each following a new set of teenagers with attitude and thematically tied costumes, have been appearing on TV every year or so for the last 20 years. But this latest reboot, backed by a collection of rising talents and one of the best effects shops in cinema, aims to restore the Rangers to their former glory. The new film, Power Rangers, is currently scheduled for release on March 24, 2017. On October 8, 2016, Lionsgate released the first trailer to celebrate New York Comic Con. The trailer offers some basic setup for the story, with five teenagers discovering a mysterious object that grants them powers. What else does the new Power Rangers movie have in store? Follow us below for everything we know so far. Giant robots, super-powers, and Bryan Cranston. The second, full trailer for Power Rangers (embedded above) was released on January 19, 2017, and featured our first good look at the title characters in costume and in action. Along with providing a bit more context for how the film's high school students became super-powered protectors of Earth, the trailer also offers a nice taste of the massive action sequences that will unfold as the Power Rangers take on the evil minions — both small and very, very large — of the movie's primary villain, Elizabeth Banks' sinister Rita Repulsa. The trailer also included the first look at Breaking Bad star Bryan Cranston's character in the film: The Power Rangers' mentor, Zordon. Oh, and it also gave viewers a sneak peek at some of the vehicles — including ships, robot creatures, and the colossal "Megazord" robot — that the team will use in their effort to defeat Rita Repulsa. Basically, there was a lot to see (and the studio hopes, to cheer about) in the second full trailer. Who are the Power Rangers? For those unfamiliar with the long-running series, the Power Rangers franchise began in 1993 with Mighty Morphin Power Rangers, a children's show that followed a group of teenagers who, in between going to school and volunteering at the local community center, battled aliens who routinely attacked their city of Angel Grove. The teens had special armor that they "morphed" into, each of them wearing a different color. They also piloted giant robots called "Zords," which could combine to form a bigger robot known as the Megazord. MMPR was not an entirely original creation. The concept and much of the footage for the action scenes were lifted from the Japanese Super Sentai franchise, with Saban Entertainment splicing in scenes filmed with American actors. The series proved to be a huge success, however, spawning numerous sequel series and moving a lot of merchandise. Who's making the reboot? The film is being produced by Saban Capital Group — an investment firm owned by Haim Saban, creator of MMPR — and will be distributed via Lionsgate. In keeping with the recent trend of hiring up-and-coming directors to handle reboots, the producers tapped Dean Israelite, who last directed the found-footage film Project Almanac. It's hard to say what this will mean for the quality of Power Rangers; Project Almanac certainly had some cool ideas, but was middling overall, and the film's style says very little about the director's skill. The screenplay has several names attached to it. Among them are screenwriting duo Ashley Miller and Zack Spentz, who previously collaborated on the shows Andromeda and Fringe, as well as superhero films such as Thor and X-Men: First Class. Also writing the film is John Gattins, perhaps most famous for the Flight screenplay, for which he received an Oscar nod. Gattins also wrote the screenplay for Real Steel, which, like Power Rangers, involved giant fighting robots. Who is in the cast? The film appears to be a complete reboot, with relative unknown actors stepping into the roles. Playing Jason, the Red Ranger, is Dacre Montgomery, an Australian actor with no notable roles up until now. In the original series, the Red Ranger is the leader of the group. In the role of Billy Cranston, the Blue Ranger, is RJ Cyler, who played Earl in the recent critical darling Me and Earl and the Dying Girl. Assuming the new characters line up with their classic incarnations, Billy is the team's scientist/engineer, who designs new equipment for the team. English actress Naomi Scott will be playing Kimberly, the Pink Ranger, who was a snarky valley girl and gymnastics expert in the original series. Chinese-Canadian actor Ludi Lin will play Zack, the Black Ranger. Rounding out the team is singer Rebecca Gomez (stage name Becky G.), playing the Yellow Ranger. Trini, Gomez has appeared in several TV roles, most notably in Empire, but this is her first role in a major film. While the Rangers are mostly of up-and-coming talents, the film does have a couple acting heavyweights to give it some gravitas. In the role of Zordon, the benevolent alien who grants the Rangers their power, is Bryan Cranston, aka Walter White from Breaking Bad. Cranston announced his involvement with the film over Twitter in June, 2016. Excited to play #Zordon in the #PowerRangersMovie! T or F: #BlueRanger Billy Cranston was named after what actor? — Bryan Cranston (@BryanCranston) June 21, 2016 This is not Cranston's first involvement with the Power Rangers franchise. Cranston voiced two monsters in the original Mighty Morphin Power Rangers, and according to his Twitter post, the character of Billy Cranston was actually named after him. Another actor of note appearing in the film is Elizabeth Banks, playing the Rangers' iconic nemesis, the alien witch Rita Repulsa. Banks' casting was first announced in February 2016, through a post on Instagram. The first image of her in costume was revealed by People. Rita's new costume caused a stir among fans, with many complaining that it looks too different from the gooly outfit the original Rita wore. For her part, Banks considers the new Rita to be a "modern and edgy reimagining of the character," according to her interview with People. In the classic series, Rita was a galactic conqueror who was imprisoned by Zordon. When a pair of astronauts accidentally opened her prison, Rita broke free and targeted Earth, prompting Zordon to recruit the Rangers. Will her backstory with Zordon be different in this new film? That remains to be seen, though Banks did hint that she wanted to give the character a backstory that connects her to the new Rangers. In September 2016 it was announced that Bill Hader will play Zordon's robot assistant, Alpha 5. Aye-yi-yi! Welcome #BillHader as #Alpha5 to the #PowerRangersMovie - Coming in 2017! pic.twitter.com/EeJqEPISE — Power Rangers (@ThePowerRangers) September 22, 2016 A Saturday Night Live favorite, Hader is no stranger to playing robots — he contributed to the voice of the droid BB-8. Alpha 5 was a much more talkative character in MMPR, so hopefully this role will give him more to work with. Who's missing? Fans of the original series may notice some absences from the cast list so far. For one, there are no mentions of Bulk and Skull, the school bullies who frequently tried to prank the Rangers, only to be thwarted every time. They were a recurring source of comic relief in the show, but perhaps their brand of slapstick humor is not suited to an action film in 2017. Also missing is any mention of Tommy Oliver, the Green Ranger. In the original series, the Green Ranger was a lone wolf who fought the Rangers before eventually joining them. Played by MMA fighter Jason David Frank, Tommy is one of the most popular characters in the franchise, having appeared in more than five Power Rangers series. Neither Frank nor any of the original cast seem to be involved with the new film, either. Appearing as a guest on the Audible Exquisite podcast, original Black Ranger Walter E. Jones indicated that none of the original cast members had been asked to appear. New outfit designs Zordon's classic Power Rangers' costumes were not the most impressive — after all, they were made for a low-budget kid's show. To beef things up, Israelite turned to Weta Workshop, the design studio that worked on the Lord of the Rings films, to design the costumes for the new team. First revealed to Entertainment Weekly, the new costumes definitely have a post-Iron Man look to them, with hard shells rather than the spider of the old suits, and a glowing chest plate. The filmmakers have also released a photo showing the actors wearing the suits, minus the visors. The first actual glimpse of the new Zords came in the form of posters released by the studio in September. From what is visible in the posters, the new Zords appear to be more angular than the original models. Rita's outfit points to a grittier look and feel? Aside from the names of the characters, the plot and vibe of the film is largely a mystery. Presumably it will begin with Rita invading earth and Zordon recruiting the Rangers. How closely will the new versions of these characters resemble the originals? So far, the cast and crew have been secretive about such details. Among the initial reactions to Rita's new outfit, which makes her look decidedly more frightening, were concerns that the new film would take a darker approach to the Power Rangers story. Speaking to Empire, Israelite has stated his desire to make the story more "character-driven." In regards to tone, he claims that the script presents a "mature but still playful, buoyant and fun take on the material," according to an interview with IGN. The only photos released that give any hint about story are images of Rita in action, such as the image below in which she has Trini against a wall. When will filming be completed? Will there be sequels? Filming has apparently already finished. On May 28, 2016, Naomi Scott said "And that's a wrap" on Twitter. In addition to set photos and the first trailer, several posters are available. Does this new film herald a bright future for the franchise? Lionsgate CEO Jon Feltheimer seems to think so. During a conference call, Feltheimer claimed "We could see doing five or six or seven," according to a report by Variety. We'll be updating this post regularly, so stay tuned as more unfolds. Updated on 01-19-2107 by Rick Marshall: Added second full-length trailer. Editors' Recommendations
