Jeff Fehring wants a way to find and eliminate duplicate music in his great collection of music. There are many good programs to find duplicate files, based on the name of the file, size, and verification check, but find duplicate music can be more complicated. After all, if you have the same recording in .mp3 and .m4a formats, you have duplicate songs that are not duplicate files. So you need to search for metadata - the extra information that defines the contents of a file. Specifically, you need a program that can correspond to the songs with the same title and the same artist (because crushing the mouth À á Ę ∞ I am a believer is a duplicate of the original of the MONCOS.) You á Ę á Ę ∞ It can differentiate between the original recording of the studio and the version of the live concert. (I know dead heads with probably ten versions of À á Ę ∞ - "broke-down palace.À Ę á Ę ∞) But the right program can give you reasonably accurate lists to work. Here are three that I can recommend: iTunes: Well, no, I would not recommend you download and install iTunes just for this purpose, But if you're already using, you have a good search tool. Just select file á Ę á Ę ∞ Show duplicates. If you have the same music What a .mp3 and a .m4a, iTunes list will both, but will not find any .wma versions. Duplicate Cleaner: This free duplicate DigitalVolcano locator has some musical features that are worth it. After pointing it to your music folder, select the music search option. Underneath that, I recommend that you check the artist and the title and uncheck the ilbum and click Go. But there is a serious failure: duplicate cleaner does not consider duplicate songs if they are in different On my tests, one... wma and a .mp3 of the same song did not join. Abee MP3 Duplicate Finder: If you are willing to disburse US\$20, and all of its It is in .mp3 files, .wma and / or .ogg, this is your best choice (or at least the best I know). ABEE allows you to search for duplicates or "similar files", and with the posterior option, you receive some very intelligent choices. You can control the degree of artist and similarity by title (which Beatles vs. The problem of the Beatles) and set how much of a time difference is allowed. After offering a list of provable duplicates, it offers many options to play, delete or move the files. (Click the image for a closest appearance). Add your comments to this article below.
