It's a bit 7.00 in Bellevue, Washington, where Collins, like many people in America, is welcoming at home with her family. He ended up around 5 d El morning, as well as usual for him: get out of bed soon allows him to enter a workout, start writing, and work on other projects before his two daughters woke up. This type of self-discipline helped him throughout his career. Although he now identifies himself as a financial educator, he spent seven years to play in the NFL before moving away from a salary from \$ 925,000 and working to become a financial advisor. Now in his 1930s, Collins looks back to his non-orthodox path from his World of Finance and is able to pull out some of the precious money lessons he learned along the way "Lessons that is Anxious to move on to a new generation. Money was not always in the mind of Collins. In fact, until the NFL did it, he did not pay much attention to All.Collins grew up in Orange County where his father was a lawyer: It grew up in "a bubble, around people with a lot of money." However, he felt disconnected from the subject and did not learn a lot about it. "No one in my family discussed the money. No one in my family has understood the money, "says." My father's financial plan was, "Get a good job and avoid debt." "Jedidiah Collins.Courtesy Jedidiah CollinsCollins' Family loved the loved sports, although both for him More played and observed the basketball. When he arrived, the football coach in his high school in the Viejo mission he thought that he should try football, instead. The coach was wrong: Collins joined the team as a linebacker and yes It revealed a good player to earn a division 1 scholarship, the highest Echelon in university sports. So, after Collins graduated at high school, he packed and went to play Washington State University in 2004. Acto enough to acquire the attention from NFL Scouts. Although it has not been selected in the 2008 Draft NFL, he received an offer to sign with the A eagles Philadelphia as a free disappointed agent as a fullback. The NFL, Coll NS says, it was a "beautiful distraction", especially in 2008 and 2009, especially in 2008 and 2009, especially in 2008 and 2009 as the financial crisis was taking on hold. Indeed, football gave him the possibility of dodging the great recession: he didn't directly hit him. This does not mean that his early football career was smooth or easy, however. Collins was cut by eagles in 2008 and bounced in different teams practice teams. He still gained a considerable bustout - about \$ 5,000 a week-but not the possibility of getting on the field on Sunday. You used years old "Helpers" Build a thick skin and a big sense of desperation, "which helped him tremendously go ahead. An NFL career generally does not last long: The medium media football player Only for two or three seasons. Making it as a professional athlete is incredibly difficult, and can take a toll both physically and psychologically. In response, Collins moved the mentality of him. He realized that football was "a game of thumbs" and that he was not focused on his primary function on the field. He work of him, like a fullback, was to block opposite players, and he needed to focus on doing that and only that. Video of Jason Armestothat Realization helped helped Become a better player, and finally had a shot to go to the field in 2010, during a preseason game while playing for the Tennessee Titans. He made the most of it, playing between 30 and 40 games, against the New Orleans Saints. The Saints were impressed and called Collins after the game. They eventually signed him, and he spent four years playing for the team with NFL Superstar quarterback Drew Brees. A key lesson learned from Collins him time in the NFL is that "more money does not solve your problems," he says. "From someone who does not understand the money \$ 100,000, will lose everything if they do not learn to use it the right way." He learned that lesson the hard way: "I received my first check in the NFL and spent every dollar of it before he opened his envelope." Even the business degree he's not prepared to understand how to manage their money. He bet that he was making poor financial decisions, Collins had an "awakening." One night, as a 22 year old rookie who lives in a hotel in Cleveland, he saw an ESPN documentary called "broken", on professional athletes who burn quickly all their earnings and eventually end up in bankruptcy. He made an impression: later that night, he awoke in a cold sweat, agony on his had spending decisions. The next day, he went to a bookstore and bought the personal finance books. "That documentary shook me. It made me frightened," he tells him. From someone who does not understand the money \$ 100,000, are going to lose everything If you do not learn to use it the way corretto.JedIDIAH collinsCertorify Financial Planner, former NFL player at the same time, Collins and other NFL players started to learn more about emerging research on the physical and psychological toll that football takes on the body. Chronic Traumatic Encephalopathy (CTE), a degenerative disease caused by repeated head injuries, has become a topic of great concern for many football players in recent years. For Collins, that knowledge is emphasized the point that he could not play for long without risking serious injuries and long-term football, and that he probably had only a few years to gain priority in the NFL. He had to make the most of them. "I was struck with the realization of what can physically damage the game, and I was afraid to walk away with no money to show for it," he says. "It was fear that led me to education and education that eventually led me to my passion." So, in 2015, Collins "Who was then 29, married and a new father - called his agent and told him that he was ready to retire. At that time, after playing in the NFL for seven years, was earning \$ 925,000 a year. his time in the NFL, Collins had already taught his teammates, family members and friends about personal finance - helping Wade Through misleading financial terminology, explaining their benefits to them, and more. financial literacy, had learned, "he was not just an NFL problem. It's a systemic problem. "After leaving the League, Collins its places a PCP or a certified financial planner. Atterra a job as a financial consultant with Brighton Jones, a holding company seattle, and began studying for its certification. he started going to high school and university schools to teach financial literacy courses and workshops, and then started to put together the financial education materials to teach clients Brighton Jones about 401 (k) s. "I love and I have energy to educate people," says Collins, who pushed him to teach more often. I love and get energy from education of the people. the beginning of 2020, Collins has left Brighton Jones and has ventured alone under his Banner "Rookie to Veteran" His new company focused on financial education. "I wanted to reach past the rich," she says. The pandemic presented it with some significant obstacles. He had to delete workshops in person and rotate his business model to fit. Overall, Collins says, things are out. It is at work on the follow-up of his book, "your money vehicle", which hopes to help others move their behaviors and attitudes towards money. Forward, you are planning new online courses, books, podcasts and online virtual training courses designed to use from schools and companies to teach students and employees to take wise financial decisions. This is what keeps him in the morning: he is passionate about teaching and improving financial literacy so that other people do not wake up in the middle of the night, as if he did, plagued by a sense of existential and financial dread. Collins "a former professional soccer player, a wealth manager, and now a teacher - has found his personal end area." This is my new world, he says. "My mission is to teach. "Other from Grow: Image: Collage; Petr Cech, Cristiano Ronaldo, Lionel Messi There are thousands of soccer players in the world but only a hundred selection do the best.
