## How to set the time on ronstan clear start

Learn the simple steps you can take to ensure that your home, family, and belongings are safe when the summer months start. (0) Hats Beanies & Visors (0) Hats Beanies & Visors Home Sailing Fix It Anarchy Ronstan Clear Start Watch Home Sailing Fix It Anarchy Ronstan Clear Start Watch Water and Shock resistantConvenient viewing with its big digital displayBold styling and updated sailing functionsA real-value for multi-functionalityA bit difficult to activate and figure out at first The sailing season varies around the globe, but the one thing that does not change is the items one needs for sailing.Factors you should consider when choosing a reliable sailing watch are water resistance, material and brand, functionality and price. Among the many styles you can choose from, one that stands out is Ronstan ClearStart Sailing Watch.The watch is comfortable, simple, yet durable. It is also reasonably priced with multi-functionality that is perfect for the sailor in you.If you are looking for a less complicated but competitive edge sailing watch but do not have the budget, this watch is for you. The style and functionality of the Ronstan ClearStart Watch are unequalled, yet it is affordable and easy on the pocket.What Do You Get?The watch comes with a secure and comfortable black silicon band reinforced by a stainless steel buckle and silicon retainer. The watch itself comes with a durable, ultra-clear crystal, mineral lens with a luminescent backlight and reinforced at the back by stainless steel. It is also equipped with a CR2 lithium battery and a user manual to guide you on its use. It is also available in blue-grey and red color silicone bands.Best FeaturesState-of-the-Art Race Functions and Bold StylingThe watch combines real sailing functionality with fashionable styling. It features big buttons for easy to read displays and advance built-in programming specifically designed for the true sailor. Crafted from the combined ideas from some of the world's top sailing enthusiasts, the Ronstan ClearStart race timers and watches can surely set the standard in the years to come. Shock and Water ResistantFashionably designed to withstand the rigors of competitive sailing, the Ronstan ClearStart watches are highly shock resistant and rated 5ATM water-resistant.Real-Time with Multi-line DisplayLet's discuss the ease of switching between time modes and count down. The Ronstan ClearStart displays actual time below the count downtime using its multi-line large display.It features oversized display digits for easy viewing. The 50 mm watch displays a 13mm digit that you can quickly view without taking your hands off the helm. The race timer has a 16mm size digit that you and your crew can easily view when mounted to the mast base or boom.Re-synchronization Race SequenceDuring the race, it is almost impossible to synchronize your watch at the exact second of the race's start sequence. With the Ronstan ClearStart SYNC function, you can easily re-synchronize to the official race time. Just a press of a button allows you to get your starting sequence back.Pre-programed Race Sequence SoundsThe Ronstan ClearStart has a built-in sound signal that allows you to know where you are in the sequence start without glancing at the display. It is pre-programmed with Match Racing and World Sailing 5-4-1-0 start sequences. You also have the option to program it for other countdown sequences and turn it off when not in use.Count down - Count up SequenceYou can choose to set up a general recall restart by repeating the countdown at the end of a sequence or you can count up to track the elapsed time. The choice depends on your personal preference.Real Life FunctionalityAdapt your daily life activities with your Ronstan ClearStart sailing watch using its standard date in day-month or month-day format, 12 to 24-hour time format that includes hours/minutes/seconds, daily alarm, and chronograph. You can use it as an alarm to wake up or a timer for working out. Scheduling sailing dates and races is easy with the standard calendar month.Luminescent BacklightNighttime is not a problem with your Ronstan ClearStart sailing watch because it has a full-face bright electroluminescent backlight that you can turn on at a press of a button for a 4-second quick view.As mentioned above, turning it on is quite tricky even with the provided user's manual. To turn it on, you need to press and hold the CLEAR button while simultaneously pressing and holding the MODE, SYNC, and START/STOP buttons for 5 seconds.Once you get familiar with the buttons functions, setting up sequence and timers will be a breeze. The pre-programmed setting can help you use the product to its optimum capability. The buttons allow you to switch in different modes quick and easy.The best part is you can mount it on a mast, boom or deck or wear it on your wrist. If you choose to mount it, you can remove the wrist strap and fix the housing onto your boat with M4 fasteners. Make sure you secure the timer before using. The oversized digital font makes viewing easy either mounted or worn on the wrist.The Ronstan ClearStart Sailing Watch is a real value for the money. Its multi-functionality is worth more than its price. It exhibits superb styling and functionality accompanied by its accurate start timer. Its large display and intuitive programming makes it beneficial for all sailors, seasoned or amateurs. Overall, it is an excellent watch that is not too complicated, yet provides the competitive edge any sailor is looking for.CHECK LATEST PRICE ON AMAZON.COM As far as I can this is a fairly popular sailing watch, if looking at what is on the wrists of sailors at a number of sailing clubs around the East Coast of Australia, this a great watch for the club racer with plenty of options at a reasonable price, however this occasionally go awry with the Ronstan Clear Start Watch Resetting itself, especially when the light button is pressed. Not mentioned in the instructions is what happens when the battery of the Ronstan Clear Start watch gets a bit flat, is that when you press the set button the watch momentarily displays every character on the dial then resets itself to 12:00. Seems that if the light function is turned on (Set turns the back light on) and the set button is pressed it turns on the backlight, which draws a lot of power. Drawing more power from the weak battery causes the voltage to drop to a point where the watch resets. The watch was also behaving strangely when the clear button was pressed. I normally reset the time before every race and pressing the clear button enters the appropriate mode, every digit and icon on the display would turn on when clear was pressed and it just sat there sulking eventually resetting itself. A fresh battery fitted and all is good again. Thanks to a contributor to Sailing Anarchy who goes by the name XZZZY who posted this information long before I knew there was a problem!
