Hibernate real battery saver mod apk

► Auto shut down background apps. Closed apps will not restart. Way boost battery life. These are what make ShutApp an extraordinary b... ► Auto shut down background apps. Closed apps will not restart. Way boost battery life. These are what make ShutApp an extraordinary battery saver.

► Features: Perhaps the best battery-saving app available today! * One tap and quickly close battery-draining apps. Closed apps will not get restart. * Auto shut down background apps on unrooted phones. * Block data flow when phone is not in use and only apps in active list have access to network. (This feature requires to install Doze, the other app developed by us.) * Receive notifications and quick access to shut down apps via floating MagicBall * Save on data usage over cellular network by closing unwanted apps. * Easy lookup to see what apps are running and quickly stop them with one tap. * Whitelist option available to exclude apps from hibernation. * Find great apps you like in AppCafe which updates every day. Unlike any other battery-saving applications, ShutApp saves your battery life in a unique but quite effective way. It detects and shuts down lurking background apps on your android phones or tablets. In this way, ShutApp makes huge difference to your battery life. Tests show that keep apps from running in background is the simplest, fastest and most effective way to boost battery. That's why we call ShutApp a real battery saver. With pro-level battery management that is way better than other apps, you can now really master of your device and vastly improve battery life. ► What Media and Users Have to Say: "My battery last WAY longer now that I use this app. I'm totally in love and couldn't be happier with this genius app." - Jemmuel Apostol "ShutApp is free, simple to use, and doesn't require root." - WonderHowTo "O ShutApp é um aplicativo muito útil para usuários que desejam melhorar a duração da bateria de seus dispositivos Android." - Brazil Techtudo ► Permission Settings ShutApp will only work when allowed via the Accessibility settings on your device. Please follow the prompt upon launching this battery saver. ► Notices 1. Due to the limitation of our resources and complexity of ROM, we cannot cover all devices but we are trying our best to test on Android devices as many as possible. If ShutApp does not work properly on your device, please contact us immediately so that we can find a solution for you. 2. The percentage of battery and network data saved is calculated on the basis of an algorithm developed by us. It is not 100% accurate but we are working on it to improve it. 3. Google allows Android apps to work in the background. ShutApp does not mean to interrupt all background apps but for the ones that do not need to be working in the background, ShutApp can help you shut down them to avoid consuming more battery or network data. 4. ShutApp will obtain your IMEI number (it is a device serial number NOT personal data) in order to get demographics and stats of app usage so that we can improve it targetedly. The IMEI information will be protected. 5. All the apps recommended in AppCafe are free, some of which includes in-app purchase. If in the future we recommend paid apps, we will indicate on the page. We disclaim any liability for any damages, losses or other claims arising from your download and use of a recommended app. ► Special Thanks To: Aquila (Russian translation) Valdemar Traça (Portuguese & Spanish Review and translation) Nguyen Lam (Vietnamese) ► Any problems? (Google Community is preferred as you may find answers to your questions here. Also, members can opt in ShutApp beta test channel before an important feature is released to public.) In this version, ShutApp will let you know when its accessibility service is disabled and tell you how to re-enable it to get it work again. Requires Android-4.1 and up Best Battery saver app available on play store Hibernate – Real Battery Saver which not only saves and improve battery life of your android smartphone by hibernating the most power consuming apps and settings, it also cools down the CPU of your android device to improve condition of your phone so that you can have a smooth and lagging free experience of using your phone.The Unique thing about Hibernate is it start working only when the screen is off. It hibernates the power consuming apps and setting you choose to hibernate only when the screen is off, without interfering your day to day operations.And as soon as you switch on your phone again, all the apps or settings hibernated will start again and continue their regular operations normally, so you don't have to check or uncheck these apps or setting to hibernate every time. You can choose the apps or settings to hibernate and practically can forget. Hibernate – Real Battery Saver will manage all these for you.So that you can have more battery power and better condition every time you use your device without any interference in your smart phone experience.★ App Hibernation Smart phones today are capable of doing so many things to make user experience smarter. This needs lots of back processes and settings which continuously runs in the background whether you are playing game or using any app. There are so many apps like social media apps continuously run in the background to provide you update of your profile. These type of apps also keep running when you are not using your phone, in the process draining lots of battery power. Hibernate kills these type of apps when the phone is in ideal condition to save ample amount of battery life.★ Setting Hibernation There are many setting like Bluetooth,Sync, WIFI and Data Connection which also consume power. Hibernate also shuts down these settings to save extra battery juice and as you switch on your mobile again all the settings you had hibernated will be on working mode again.★ CPU Hibernation Whether you are playing a game, updating app or saving a photo in gallery, CPU is working continuously behind all these operations of your smartphone. CPU is the brain of your android smartphone which constantly computing these type of demanding task, which not only drain lots of battery, it also overheat your phone. Hibernate lock the CPU to it's lowest possible frequency which not only ensure lots of battery saving, it also prevent your smartphone to get heated which gives you smooth and lagging free user experience.Hibernate – Real battery saver is the best battery saver app which save and improves batter health with overall condition of your smartphone.Please like and comment if you like Hibernate – Real battery Saver.Mail us if you have any suggestion, feedback regarding the app, We will definitely assist you to make your app experience better
