Support the development of this app!If you have any suggestions for improving the app, please contact us at turn.appsolution@gmail.comThank you for downloading our app -Added Saving Throw entry in spell description I use this app all the time and it's a godsend for casters. When adding them to known spells it makes you choose a spell level, pointless for most classes since that's only used for prep and casting. If adding a lot of spells, don't tap too quickly because the app is too busy animating the success message and will ignore other clicks. There's only one problem: they haven't updated it past the core rulebook's classes and spell list.I would love to see them add Witch and Oracle, as well as put the new spell additions from the APG onto the list.Hopefully this happens before the next major caster-class based book comes out with Magus and Summoner, or it will only continue to fall further behind. I made the purchase to add multiple characters because I've been playing more than one spellcaster in Pathfinder 2e. It's been incredibly helpful for keeping track of spells, but one thing I would like is an update for some of the newer classes from the Advanced Player's Guide (like the Witch and the Oracle). For more information, see the developer's privacy policy. Makes Druids learn every single spell before being able to add them to prepared list, despite Druids automatically having access to all spells from their list.
