Armor Breaker is an especially nice ability that allows you to get a fast attack that applies a powerful rend; You can combine this with the Silent Shockwave Perk and you can easily hit the 30% tent which will make your attacks hit incredibly hard. Usually when you are surrounded by enemies, they are relatively weak, so increasing your damage only helps you kill the slightly faster things that were going to die anyway. We recommend that you concentrate on getting equipment that has strength or dexterity and constitution. 10. 7.2. Whirling blade spinning blade **Àcè** - **Àcè** Black 145% weapon damage to all enemies within 2 meters. So if you are looking to maximize the damage you are doing with your specific shield abilities for PVP or pure threat generation, then you want to go with round shields. Most advantages scale in power with the gear rating of the item they are in. Its heavy attacks **àd** damage to impulse with a solid pull. Instead of just 0-3 advantages on your weapon, you can get up to 6 total advantages on both items. 13. If your resistance bar runs out, then you will be stunned for a few moments and take damage from the resistance attack. Accuracy can help increase your damage with a considerable critical chance boost. This means that you have to be very fast indeed to provoke enemies the moment you realize you have no more aggro, and also that your team will sometimes have to defend themselves and survive until you are back. Block stability is a percentage that you will find on all weapons which is how much resistance damage mitigation you will have when blocking. It is similar to the third attack of your light attack combination, and is extremely fast. The sword unfortunately does not do much damage, so levels a little slower than the esab esab onad - odnarig animèAl ratìcapac. oir;Àsseccen odnauc tceper ed lic;ÀT ©À euqrop. sedadilìbah s'Àrt ed s'iam me ritsevi etnedurpmi À .SPD olep sadacof etnemarup samra sa amu .lanoicausit etnemalucidir ©À ailager atsE .tuO 40 .61 .sotnel ed ofÀSÀacilpa an e sonad sod otnema on es-artnec erorrjÀ atsE retsamdrowS erorrjÀ .1.8 .eelem sodalla arap opury ed sonad ed rotuder etrof mu ©À etamitLU etsE .opury od s'orbmem so sodota a'odnema mu anoiroporp. aS'AnaredilU .omerpuS oinÀmoD O .raeuqolb e'oduceS ues o ratnavel 'Àcov jÀraf otierid euqilCO raruges .odnacata ofÀtse sogimini so odnaUO .edadilìtu arap tellnuag ec' o raxied e' adapsE an rartnecoc es ed airatsog etnemlevavorp .otnatrop .e samra sa sabma ralacse etnemlicaf edop ofÀn 'Àcov euq aires megatnavsed lapicirp À .m©Àbmat ranoicisoper es euq mahnet sele euq moc rezaf edop ossi .eelem SPD moc ragoj es .otnatne on .sogimini so enoicisoper 'Àcov euq etimrep stop .levjÀdarga etnemlanioasico ©À kreP etsE .adapsE aut a moc adaptuge analienraC ameg amu serelit es sodnuepa 6 etnarud sogimini so sodot acot' sogimini so etnemacisard rterred a opury ues raduje edop euq ovissam etnarofrep hitw dneR racilpa arap al;Àsu edop 'Àcov euqrop .adapsE a moc ranibmoc arap amra aob amu ©ÀÀ as'Ànal. Leveling like a sword and shield can be a bit difficult. Please follow the link below for further information [p](#). Resistant Shield and Elemental Resistance help you withstand less damage from sources. There aren't many sources of debuff padding in the game, so there's an extra that'll help a lot. Your final gift, defensive form, makes when you don't block a 2 meter circle appear around you. Combined with the multitude control that Ice Magnuntlet provides and the ability to effectively give yourself a second health bar, the ice cabinet seems to be an interesting tanking option. Achilles' heel allows your chain of attack to apply a slow one and then the opportunist allows you not to do more damage to slowing enemies. Hitting back enemies **À** ok, but usually s' causes quest [p](#) the rest of your group. Taunts all enemies within 8 meters for 6 seconds, if you don't have a **3** of carnelian equipped on your sword. A drawback You would not have any ability to move between these weapons. 7.5. Shield Rush Shield Rush "Hurry 5 meters beating enemies and dealing with 125% weapon damage. The sword attributes the balan sword mainly with strength, but also **è**m scales with dexterity, making it able to easily accompany a weapon that scales any of these attributes. Gorjante Ice "This is an extremely strange combo at first sight, because the trash and the tank do not usually go together, but here they do. You won't want to stand in front of your allies and intercept incoming **è**til projects and melee enemies for your less resistant friends. In PVP, this privi is quite cool because it can help you avoid enemies or reach them. No. The challenging posture will not start its cooldown until its effect has expired. While you can not spend mastery points on more than 3, there is a wasting of points since respecting are quite cheap to do. Patch Sword 1.1 Changes with Patch 1.1 of the New World Having been released on November 19, we prepared patch notes with comments The sword gun. 2021: Guide Created. Shield Bash Bash Shield Bash . offers 50% weapons damage and stuns the enemies in front of you by 2.2 Why does equipping different armor not change my attributes? Can I use the uptime reduction to get permanent uptime in a challenging position? There is something really satisfying about running over someone in PVP with a bloodlust. This Perk is extremely nice for the tank, because taking a powerful burn or poison from you and on your enemy just feels great. 9. Likewise, if a Master has a vertical line connecting him to a Master above him, then you must first select the upper Master in order to unlock the lower ones. Overview of the Sword Mastery Like all other weapons, the Sword has two Mastery Trees. No. The defiant stance will be removed if you exchange weapon or sheath your weapon, including opening your inventory or collecting raw materials. The Sword scales with mainly Strength, and Dexterity secondarily. Sturdy Grip is great for making your blocks more effective, and defensive training allows you to gain block Fortify. Turret shields are the inverse of this, with the most block stability and the least damage, while kite shields are the middle ground. Patch 1.1 Changes to Sword 2. Faction armor in particular does a good job of providing a balance of Strength or Dexterity, and Constitution. The Great Axe does a great job of closing gaps and closing in on enemies. You can also get some crowd control with Sweep. For the weapon jewelry, we recommend the Malachite Pristine Cut, since you will probably be slowing down enemies with the Achilles Heel. 7.6. challenging Stance Challenging Stance ÀeÀÀ For 8 seconds, reduce the base damage received from attackers by 30%. Finally, there are three types of shields in the game: Round, Kite and Tower. The Sword, like all other weapons, has six abilities; however, you can only use three abilities at any one time on your action bars. If you are Shield Rush then you should try to get this Perk. Then get Unstoppable Stab, Opportunistic, and then Tactical. Tactical helps redefine our other two skills because it reduces the cooling time for every enemy that is hit. If you can't find one, then you can't create it for yourself in the Forge. Gaining Fortify It's always good because it reduces the damage you don't take. Great Ax Ae Climbed mainly with ForÀsa, this is a great pairing with the Sword. We recommend taking the following Dom Points: 7. If you are using the Whirling Blade then this is a good Perk to get. 17. The Shield offers an additional equipment slot, so you will not notice that all the attributes of both the Sword and the Shield are half of what you would not get with the same Gear Score Weapon of a different type. The shields are not damage because this is what is used to calculate the damage caused by Shield Bash and Shield Rush. Taunt will force the enemies of the PvE to focus on you, but enemies often end any animations **u** attacks that they are already carrying out against other targets first, before they return their response to you. 2021: Fixed a small typing error. This Perk's cool, but situational. The shields are also heavy and will affect the load of your equipment while it is equipped, so we recommend that you always have a full heavy load when using a Shield. For armor gems, we recommend either Cut Pristine Onyx or Cut Pristine Diamond to provide physical damage abscction. Round Shields are all a 30% block stability, Kite Shields are 40%, and Tower Shields are 50%. For armor gems, we recommend either Cut Pristine Onyx or Cut Pristine Diamond to provide physical damage abscction. 7.1. Reverse Stabbing Reverse Stabbing - A stabbing attack that causes 175% weapon damage. We recommend taking the following mastery points: 6. These can be rare to find in the equipment and are mostly just a **3**. Your mild attacks are one two cuts followed by a spinning attack that all cause damage from cuts. 12. Can't you activate the sword's defiant position and then exchange weapons to keep the buffer? The Great Ax also has a spinning that you are in Reap. If you don't find yourself needing more teasing **p** or healing. Note that you will gain Attributes and Advantages of your Shield while it is out on your hand, so you will not gain any benefit from it while using your other weapon. The only weapon to be paired with the Shield, the Sword offers many strong defensive [p](#). 7.3. Leaping Strike Leaping Strike ÀÀ Jump 6 meters and cause 135% weapon damage. While you can't unlock all six Skills at once, you'll be able to put three Skills in the **p**s bar at a time. After you have these tans and a carnival leveling in your gun, you will not be able to provoke and you will not have to worry about leveling the Sword more than you want. 15. After that, take the Final Count, Restoration, and Achilles' Heel. We recommend that you take care of this regalia. While there are several weapons that can tank, the sword is the best. 19 Nov. Fortifying Shield RushÀ After hitting a target with Shield Rush, gain Fortify, increasing the absorption of damage itself by 19% for 4 seconds. Combined, you don't get the same amount of Attributes yet, but that's not all you don't get. 8. If you do not find yourself using the third attack of your Light Attack combination you can not choose anything more than the Final Strike. 3.11. Contagious Reverse Stab ÀÀÀ Reverse Stab transfers an active self debuff to the hit target. 8.2. Defend Tree The Tree Defender is full of powerful defense buffs that you can't find anywhere else. This weapon is strong against the enemies of the type of the Ancients, which conceals the inherent weakness of Sword against them. Allies within this circle will have 30% less hit damage once every second. Accelerated Defiant Stance ÀÀ Motion speed increased by 28% for 5 seconds **3** the Defiant Stance drive. In the beginning, this seems so until you that Tactician can help reset your cooldowns extremely quickly if you hit several enemies. Where do you get the sword take your first Sword, whether it's killing enemies or killing dogs. 1. One disadvantage would be that you do not have the ability to move, so traveling on rivers will be a little painful. painful.
