MULTINATIONAL INDUSTRIAL SECURITY WORKING GROUP

MISWG DOCUMENT Number 26
22 December 2019

CYBER SECURITY INCIDENT REPORT FORMAT

1. INTRODUCTION

1.1 This document provides a format for reporting cyber security incidents at contractor entities, when there is a national reporting requirement to do so.

2. SCOPE

2.1 The attached Cyber Security Incident Report format has been approved by the MISWG participants for reporting cyber security incidents at contractor entities. This form may also be used to document and triage INFOSEC and other related incidents.

2.2 The aim of this cyber security incident report is to be used by the security or other appropriate officers of industrial facilities to immediately document and report loss/compromise, suspected compromise, suspicious contact, or activity involving systems accredited to process classified information. It may be used as a preliminary response to supplement national reporting requirements and provide a resource to document initial or first response to a cyber security incident.

2.3 The responsibility solely rests on national security authorities to adopt or not a form to report cyber security incidents. The classification of the completed form depends on national regulations and therefore is required to be transmitted appropriately depending on the level of classification assigned to the report. The assumption is made that any security incident involving classified information and foreign government information, including assets and information stored, processed or generated, in relation to a contract or capability must be reported immediately to the appropriate national security authorities. In turn, they will collect initial details then advise who else should engage in the inquiry.
