Smith and wesson m

Smith & Wesson is an American company founded in 1852, specialized in firearms production. In recalling its history, it is important to mention the revolver Smith & Wesson Model, which was the first modern weapon, using integrated ammunition. Specifically, for the purposes of the 1861 Civil War, he began producing another revolver, marked Smith & Wesson Model 2. Its short loading time was a great advantage, which determined its success. Today, the Smith & Wesson brand is one of the world's largest firearm manufacturers, shooting equipment for amateur shooters and uniform services. The offer includes models for hidden transport, sports guns, revolver, sports rifles and precision shooting rifles. The most popular models are Smith & Wesson MP9, but also MP 40. The replicas of the Smith & Wesson weapons stand out for their high quality and accurate reproduction. They are made with a full license, which allows them to be marked with brand names. Most of them are made of metal lock and a durable polymer. One of the most chosen models is the aforementioned Smith & Wesson MP9. It stands out for a light lock that increases the shutter speed and ensures optimum gas consumption for each shot. It also has the ability to change the coating of the grip and therefore better adapt to the hand of the shooter. As replica of small weapons we also recommend the Smith & Wesson MP40, which was also made under the license ofOriginal manufacturer and has markings impressed on it. thanks to its small size, ergonomic shape and low weight works well as a side weapon. is one of the S&M co2 guns, i.e. replicas powered by co2. the model provides a high ocyte rate thanks to the high pressure generated in the capsule.
